

TOXICOLOGY REFERENCE LABORATORIES

Scope: The purpose of this document is to offer our customers a convenient list of private toxicology laboratories. The primary reason for this list is to address situations when the toxicology requests are outside the scope of the Crime Laboratory. The laboratories on this list have been assessed by recognized external bodies. This accreditation/certification process provides some quality assurance regarding the laboratory's work.

No laboratory endorsements are implied by this document. The Crime Laboratory recognizes other qualified reference laboratories do exist (see the accrediting/certifying body links below).
