11.4968 Litigant cannot fairly be held to have waived argument invoking theory or doctrine that, at the time, court of competent jurisdiction had not yet recognized or announced (see sec. 11.4693) ................................................................. 11-86
11.4969 To avoid waiving argument on appeal, party must develop argument in principle brief; party cannot preserve argument by asking for opportunity to file supplemental brief making that argument (see sec. 11.3445) .................................................. 11-86
11.497 Other matters (cont'd) ...................................................... 11-86
11.4971 Judicial estoppel (see sec. 12.623) ................................. 11-86
11.4972 If argument made below, appellant does not waive right to raise issue by failure to have cited critical decision in support of that argument .................................................. 11-86
11.4973 Effect of failure to raise issue on appeal or first sec. 974.06
motion on right to raise it on subsequent sec. 974.06 motion
(see secs. 10.243 and 10.244) ................................................................. 11-86
11.4974 Concession on issue of law does not bind appellate court
(see sec. 11.89652) ............................................................................... 11-86
11.4975 Waiver does not occur when defendant's acquiescence in
challenged action is product of Hobson's choice (i.e.,
defendant forced to make choice constituting waiver) ........................ 11-86
11.4976 Waiver rule applies with equal force to state, when state is
appellant .................................................................................................. 11-86
11.4977 If issue raised in trial court, party may be permitted to
change position on issue in appellate court ........................................... 11-86
11.4978 Waiver may not occur if failure to raise issue was result of
reasonable but mistaken view of applicable law ................................. 11-86
11.4979 Issue raised but not briefed or argued is deemed abandoned ........... 11-86
  11.49791 In general ................................................................. 11-86
  11.49792 When issue was raised and argued in circuit
court, but is not briefed or argued in court of
appeals, it is deemed abandoned (see sec. 11.47452) ......................... 11-86
11.498 Other matters (cont'd) .............................................................................................. 11-86
  11.4981 Limitations on court of appeal's review of waived error .......... 11-86
    11.49811 In general ................................................................. 11-87
    11.49812 Error in instructions ................................................................. 11-87
  11.4982 Proponent of evidence need not anticipate objection .......... 11-87
  11.4983 Party objecting to admission of evidence need not specify
rule into which the evidence does not fit .......................................... 11-87
  11.4984 Need to reraise issue or to object at trial after motion in
limine made and disposed of at pretrial hearing ................................. 11-87

issue or to object at trial ................................................................. 11-87
    11.49842 Need for opposer of motion in limine to reraise
issue or to object at trial ................................................................. 11-87
    11.49843 If issue not reraised or objection not made at trial,
party is confined to issues presented and
arguments made at pretrial hearing on motion in
limine; cannot raise new argument or objection
based on new matters presented at trial .......................................... 11-87
  11.4985 Purpose, reasons, and justifications for requirement of
contemporaneous objection and waiver or forfeiture rule in
general ........................................................................................................ 11-87

    11.49871 In general ................................................................. 11-88
    11.49872 Difference between "waiver" and "forfeiture" ........... 11-88
    11.49873 "Waiver rule" might better be labeled "forfeiture
rule"; "forfeit" is more appropriate term than
"waive" when party loses right to raise issue on
appeal through procedural default ........................................ 11-88
11.4988 Importance of waiver rule ................................................................. 11-88
11.499 Other matters (cont’d) ........................................................................... 11-89
11.4991 When objection to witness's anticipated testimony made outside of presence of jury before witness testifies, objection need not be repeated in presence of jury when witness testifies to preserve claimed error for appeal (see sec. 11.42194) ......................................................................................... 11-89
11.4992 Citation of additional authority and legal analysis on appeal with respect to argument made in trial court does not constitute new argument or advancement of new theory on appeal that appellate court will deemed waived (see sec. 11.4692) ......................................................................................... 11-89
11.4993 Effect of decision of International Court of Justice requiring states to consider claim under Vienna Convention on Consular Relations even though it is procedurally barred because of failure of defendant to properly raise or preserve it ....................................................................................................... 11-89

12.7523 Defendant's attempt, in sexual predator (i.e., ch. 980) proceeding, to prove that he did not commit sexual assault of which he was convicted does not constitute collateral attack on conviction .................................................................................. 12-77

12.7524 Stipulation to prior conviction precludes collateral attack on that conviction (see sec. 12.6112) .............................. 12-77

12.7525 Grounds for attack: Attack is generally limited to claim of alleged violation of right to counsel ....................................................... 12-77

12.75271 In general .................................................................................................. 12-78
12.75272 In proving valid waiver, state may rely on trial court's reference, in high-volume traffic and misdemeanor courts, to court's recitation en masse of constitutional rights at start of proceedings and then incorporation of that recitation by reference as each individual defendant's case is called 12-78

12.75273 In proving valid waiver, state may call defendant to witness stand and examine him regarding waiver (see sec. 25.4834) 12-79

12.75292 Court of appeals' concern that court system's record retention policy will make it difficult in many cases to refute defendant's self-serving allegations regarding denial of counsel 12-79

12.75293 Burden of proof when collateral attack is made on un counsel ed conviction on basis that defendant did not waive right to counsel 12-79

12.75294 Effect of successful collateral attack on conviction: conviction is rendered "void," not simply unusable for purposes of sentence enhancement 12-79

PART III
EVIDENCE

Chapter 13
Relevancy and Its Counterweights

13.1 Need For, And Determination Of, Relevancy Of Evidence .......................... 13-1
13.11 Only Relevant Evidence Admissible .............................................................. 13-1
13.111 In general ........................................................................................................ 13-1
13.112 Proponent of evidence must present sufficient foundation establishing its relevancy under Wis. Stat. § 901.04(1) ...................................................... 13-1
13.113 Defendant's constitutional right to present evidence does not include right to present irrelevant evidence (see sec. 28.122) .................................. 13-1
13.12 Determining Relevancy Of Evidence .......................................................... 13-1
13.121 In general ........................................................................................................ 13-1
13.122 On cross-examination ...................................................................................... 13-4
13.123 Testimony expressed in terms of possibility ................................................. 13-4
13.124 Testimony that amounted to nothing more than pure speculation ............... 13-5
13.125 When remoteness renders evidence irrelevant .......................................... 13-5
13.126 Fact that piece of evidence was not unequivocally identified as item used in crime does not render it irrelevant if it was similar to item used in crime .................................................. 13-5
13.127 Relevancy and admissibility of evidence offered to prove element of charged crime .................................................................................................................. 13-5
13.1271 In general ..................................................................................................... 13-5
13.1272 When defendant does not dispute element ............................................. 13-5
13.12721 In general .................................................................................................. 13-5
13.128 Other matters ................................................................................................ 13-5
13.1282 Conditional relevance (see sec. 20.8896) ............................................. 13-5
13.1283 Proponent of evidence has burden to establish its relevance ............... 13-5
13.129 Other matters (cont’d) .................................................................................. 13-5
13.1291 Determining relevancy of expert testimony ........................................ 13-5
13.1292 Relevance not affected by availability of alternative proofs of element to which it relates .................................................................................................. 13-5
13.1293 Inconclusive nature of evidence does not render it irrelevant, but rather affects probative value, which is for jury to determine ................................................................. 13-6
13.1294 When relevancy of evidence depends upon fulfillment of condition of fact, court may require proponent to present evidence sufficient to support finding of fulfillment of that condition ......................................................... 13-6
13.1295 Evidence that serves to prove element of crime is relevant .......... 13-6
13.1296 Evidence not rendered irrelevant simply because defendant chooses not to contest the element to which the evidence relates (see sec. 13.128) ................................................................. 13-6
13.1297 Court has "considerable discretion" in determining whether evidence is relevant .................................................................................... 13-6
13.1298 To be admissible, evidence must be "reliable enough to be probative" (see sec. 20.8896) ........................................................................ 13-6
13.1299 Relevance is broadly defined; thus, there is strong presumption that proffered evidence is relevant ................................... 13-6

13.13 Appellate Review Of Decision On Relevancy ......................................................... 13-6
13.14 Other Matters ........................................................................................................... 13-7
13.141 All relevant evidence is admissible unless otherwise provided by law .......... 13-7

13.2 Need To Balance Probative Value Against Countervailing Factors ..................... 13-7
13.21 General Principles ................................................................................................. 13-7
13.211 In general ............................................................................................................. 13-7
13.212 Fact that prosecutor could have chosen different charge cannot be basis for trial court to exclude evidence ................................................................. 13-9
13.213 Relevant evidence, if needlessly duplicative and cumulative in character, may be excluded ................................................................. 13-9
13.214 When alternative form of proof available having same or greater probative value but lower danger of unfair prejudice, probative value of item may be discounted ................................................................. 13-9
13.215 When defendant is offering evidence to defend against state's charges, trial court must resolve close questions of admissibility in favor of inclusion, not exclusion (see sec. 28.144) .................................................. 13-9
13.216 Wis. Stat. § 904.03 is an extraordinary remedy to be used sparingly because it permits trial court to exclude otherwise relevant evidence ................................................................. 13-9
13.217 May conclude that circuit court implicitly performed required balancing from fact that court gave cautionary or limiting instruction with respect to evidence at issue ................................................................. 13-9
13.218 Wis. Stat. § 904.03 does not allow court to require child to testify first before videotaped statement admitted under Wis. Stat. § 908.08 ................................................................. 13-9
13.219 Other matters .......................................................................................................... 13-9
13.2191 Opponent of evidence has burden to show that probative value is substantially outweighed by countervailing factors ................................................................. 13-9

13.22 Probative Value ....................................................................................................... 13-9
13.221 In general ............................................................................................................. 13-9
13.222 Probative value depends in large measure on temporal proximity to event at issue; effect on probative value of lapse of time ................................................................. 13-10
13.223 When probative value of evidence is needlessly duplicative and cumulative in character, it may be excluded (see sec. 13.213) ................................................................. 13-10
13.224 Effect on probative value of availability of alternative methods of proof having same or greater probative value but lower danger of unfair prejudice (see sec. 13.214) ................................................................. 13-10
13.225 When defendant willing to admit existence of particular element, evidence relating to that element has low probative value ................................................................. 13-10
13.2251 In general ..................................................................................................... 13-10
13.2252 Particular circumstance: when defendant willing to admit prior convictions, etc., that subject him to lower prohibited blood alcohol concentration in prosecution or drunk driving .......... 13-10

13.23 Countervailing Factors ...................................................................................................................... 13-10
13.231 Unfair prejudice ................................................................................................................................. 13-10
13.2311 What constitutes unfair prejudice .................................................................................................. 13-10
13.2312 Overcoming unfair prejudice by limiting instruction .................................................. 13-11
13.2313 Trial court abuses discretion if it excludes other crimes evidence that is only evidence of element of crime on basis that it is unfairly prejudicial ................................................................. 13-11
13.2314 In gauging unfair prejudice, court should consider fact that alternative means of proof available having same or greater probative value but a lower danger of unfair prejudice (see sec. 13.214) ................................................................................................. 13-11
13.2315 When defendant admits prior conviction that is element of crime, evidence regarding prior conviction may be unfairly prejudicial and thus inadmissible ................................................................. 13-11

13.232 Misleading to jury ................................................................................................................................. 13-11
13.2321 Trial court abuses discretion if it excludes other crimes evidence that is only evidence of element of crime on basis that it is misleading to jury ...................................................................... 13-11

13.233 Needless presentation of cumulative evidence ................................................................................... 13-11
13.234 "Surprise" (lack of notice to opposing party that evidence would be offered) ................................................................. 13-12

13.24 Other Matters ........................................................................................................................................ 13-12
13.241 Balancing of probative value against prejudicial effect not required unless objection made on that ground ................................................................................................................................. 13-12
13.242 Trial court implicitly holds probative value not substantially outweighed by unfair prejudice when it knows objection is unfair prejudice and admits evidence ................................................................................................................................. 13-12
13.243 Need for balancing when other crimes evidence offered (see sec. 14.27) ................................................................. 13-12
13.244 Opponent of evidence has burden to show that its probative value is substantially outweighed by danger of unfair prejudice ................................................................. 13-12

13.25 Appellate Review Of Balancing ................................................................................................................. 13-12
13.251 Standard of review in general .............................................................................................................. 13-12
13.252 Appellate court's response to trial court's failure to engage in required balancing ................................................................. 13-12
13.2521 Not role of appellate court to conduct balancing when trial court has failed to do so ................................................................................................................................. 13-12
13.2522 Trial court's failure to engage in required balancing does not require reversal if appellate court concludes such balancing would support decision on admissibility of evidence ................................................................................... 13-12

13.3 Admissibility Of Particular Evidence After Considering Relevancy And Its Counterweights ................................................................................................................................. 13-12
13.31 Defendant's Invocation Of Constitutional Rights ...................................................................................... 13-12

14.11 In General ............................................................................................................................................................................... 14-1
14.12 Exceptions To General Rule (see sec. 14.2) ................................................................. 14-3
  14.131 In general .................................................................................................................. 14-3
  14.132 Flight is not other acts evidence ................................................................................ 14-3
  14.133 Evidence is not "other acts" evidence if it is part of panorama of evidence needed to completely describe crime that occurred and is thereby inextricably intertwined with crime .......................................................... 14-3
14.14 Other Matters ............................................................................................................... 14-3
  14.141 Applicability of general rule to evidence of other crimes, wrongs, or acts of third parties (see sec. 14.322) ........................................................................ 14-3
  14.142 Admissibility of other crimes evidence not controlled by predispositions or presumptions in favor of or against admissibility, but rather by well-established rules of evidence (see sec. 14.281) .................... 14-3
  14.143 Other crimes, wrongs, or acts evidence rule not applicable when prior convictions used for impeachment purposes ......................................................... 14-3

  14.145 Other crimes, wrongs, or acts evidence not excluded because it is irrelevant, but because it is unfairly prejudicial ............................................................... 14-4
  14.146 Other crimes rule not applicable at sentencing ...................................................... 14-4
  14.147 Defendant's formal concession of, or stipulation to, element of offense may render evidence relevant to that element inadmissible (see secs. 12.6127 and 14.2154) .................................................. 14-4
  14.148 Reasons for rule excluding other-acts evidence ..................................................... 14-4
  14.149 Other matters ......................................................................................................... 14-4
    14.1491 General rule does not apply in commitment proceeding under ch. 980, Wis. Stats., to evidence offered to prove that respondent has mental disorder that makes it substantially probable that he or she will commit acts of sexual violence in future (see sec. 10.7862) ............................................................... 14-4
    14.1492 General rule excluding other acts evidence is limited to evidence used to prove past acts; it does not exclude other acts evidence introduced to prove future conduct or behavior ................................................................. 14-4

14.2 Exceptions: Admissible For Other Purposes ........................................................................ 14-4
  14.21 General Principles .................................................................................................. 14-4

    14.212 Purposes for which evidence may be used in general ........................................ 14-4
      14.2121 In general ..................................................................................................... 14-4

14.215 Applicability of exceptions to other crimes, wrongs, or acts of third

14.2162 All elements of crime are in issue whether or not defendant
disputes element ..................................................................................... 14-9

14.2163 Intent is in issue notwithstanding defendant's denial of
commission of any criminal act .................................................................. 14-9

concession or stipulation (see sec. 14.2162) ......................... 14-10

14.21644 If defendant concedes or stipulates to element
and, therefore, other crimes evidence relevant to
that element is not admitted, defendant forfeits
right to complain about trial court's ruling
admitting other crimes evidence (see sec. 14.345) .............. 14-10

14.2165 State may introduce other crimes evidence relevant to issue
even though defendant does not contest issue ............... 14-10

14.217 Defendant's formal concession of, or stipulation to, element of offense
to which other acts evidence relates (Wallerman stipulation) .................... 14-10

14.2171 Validity of .................................................................................................. 14-10

(see sec. 14.2154) ........................................................................................ 14-10

14.2174 Defense counsel not required to enter into stipulation to
avoid admission of other acts evidence (see sec. 14.21542) ................ 14-10

predispositions or presumptions in favor of or against admissibility,
but rather by well-established rules of evidence (see sec. 14.281) ............. 14-11

14.219 Other matters ................................................................................................... 14-11

14.2191 Other-acts-evidence rule not limited to acts, but also
includes verbal statements even when not acted upon ................. 14-11

14.2192 Admissibility of evidence that does not specifically detail
prior crime, wrong or act, but conveys message that prior
crime, wrong or act was engaged in, is analyzed under law
of "other crimes, wrongs or acts" evidence (see sec. 14.144) .......... 14-11

14.2193 Defendant's formal concession of or stipulation to element of
offense may render evidence relevant to that element
inadmissible (see sec. 14.2154) ................................................................. 14-11

14.2194 Determining whether evidence is other crimes, wrongs, or
acts evidence (see sec. 14.13) ................................................................. 14-11

14.2195 Other crime, wrong, or act need not precede crime at issue .......... 14-11

14.232 To prove intent ............................................................................................... 14-13

14.2642 Probative value dependent on nearness in time, place or circumstance .................................................................................................. 14-27
14.2643 When evidence too remote in time to have probative value ............ 14-27
14.2644 Similarity and nearness are not always required to give evidence probative value; dissimilar events can be relevant to one another .................................................................................................. 14-28
14.265 State may introduce other crimes evidence relevant to issue it must prove even though defendant does not contest issue (see sec. 14.217) ................................................................. 14-28
14.266 Evidence not rendered irrelevant because it relates to other crime of which defendant was previously acquitted ................................................................. 14-28
14.267 In assessing relevance, probative value of other acts evidence depends on the other incident’s nearness in time, place and circumstances to the alleged crime or to the fact or proposition sought to be proved ............................................................................................................... 14-28
14.2671 In general (see sec. 14.2642) ................................................................. 14-28
14.2672 When evidence too remote in time to have probative value (see sec. 14.2643) ............................................................................................................... 14-28
14.2673 Similarity and nearness are not always required to give evidence probative value; dissimilar events can be relevant to one another (see sec. 14.2644) ........................................................................ 14-28
14.268 Relevancy of particular other acts evidence ....................................................... 14-28
14.2681 Evidence showing defendant to be drug dealer where defendant claims self-defense when he shoots at police who are executing no-knock warrant at his residence ....................................................... 14-28
14.269 Other matters ........................................................................................................... 14-28
14.2691 Proponent of evidence has burden to establish its relevance .............. 14-28
14.2692 Evidence of behavior as child has less probative value than behavior that occurred while person was adult ................................................................. 14-28
14.2693 Implicit in decision that evidence is relevant is that jury could find by preponderance of evidence that defendant committed other act ............................................................................................................... 14-28

14.27 Third Prong Of Test For Admissibility: Trial Court’s Duty To Determine Whether Probative Value Outweighs Prejudicial Effect And Other Countervailing Factors ........................................................................................................... 14-29
14.271 In general ............................................................................................................. 14-29
14.272 Probative value dependent on nearness in time, place or circumstance ................................................................. 14-31
14.2721 In general ............................................................................................................. 14-31
14.2722 Nearness in time ................................................................................................. 14-32
14.2723 When evidence too remote in time to have probative value .............. 14-32
14.273 Probative value increased when prior act resulted in criminal conviction ........................................................................................................... 14-32
14.274 What constitutes prejudice in this context ............................................................. 14-32
14.275 Trial court not required to make this determination unless objection made on ground that probative value is outweighed by prejudicial effect ........................................................................................................... 14-33
14.276 Trial court abuses discretion if it excludes other crimes evidence that is only evidence of element of crime charged, on basis that it is unfairly prejudicial or misleading to the jury ................................................................................................. 14-33
14.277 When trial court does not expressly fulfill this duty, appellate court may independently review record to determine whether evidence properly admitted ........................................................................................................... 14-33
14.278 When other acts evidence is offered to prove status element (e.g., prior convictions that render defendant’s conduct criminal, prior conviction that is element of offense, etc.) and defendant admits status element, other crimes evidence’s probative value may be substantially outweighed by danger of unfair prejudice and thus inadmissible ........................................................................................................... 14-33
14.279 Other matters ........................................................................................................... 14-33
14.2791 Use and sufficiency of limiting instruction to dispel prejudice (see sec. 14.333) ................................................................. 14-33
14.2792 Opponent of evidence has burden to show that its probative value is substantially outweighed by danger of unfair prejudice ........................................................................................................... 14-33
14.2793 Evidence is not rendered unfairly prejudicial by timing of its presentation .......................................................................................... 14-33
14.2794 Application of this prong when defendant seeks to introduce other acts evidence relating to officer-witness ................................. 14-34
14.2795 Victim's inability to testify because of mental deficiencies adds to probative value ................................................................. 14-34
14.2796 Effect of defendant's declining instruction on his or her claim that probative value of other-acts evidence was outweighed by unfair prejudice (see sec. 14.336) ........................................... 14-34
14.2797 Effect of defendant's acquittal of some of charged offenses on question whether other-acts evidence was unduly prejudicial ........................................................................................................ 14-34
14.2798 Because probative value must be "substantially" outweighed by prejudicial effect, if probative value is close or equal to its unfair prejudicial effect, evidence must be admitted ................................................................. 14-34
14.2799 Steps trial court may take to minimize danger and lessen unfair prejudicial effect ................................................................ 14-34
14.27991 In general ................................................................................... 14-34
14.27992 Instruction on proper use of evidence ........................................ 14-34
14.28 Other Matters ................................................................................................................................................................................. 14-34
14.281 Admissibility of other crimes evidence not controlled by predispositions or presumptions in favor of or against admissibility, but rather by well-established rules of evidence ........................................ 14-34
14.2811 In general ...................................................................................... 14-34
14.2812 Decisions suggesting otherwise .................................................... 14-34
14.282 Exceptions justifying admission of "other acts" evidence not applicable when "other acts" not committed by party against whom "other acts" evidence admitted ......................................................... 14-34
14.283 Other crime, wrong, or act need not precede crime at issue .......... 14-34
14.284 Admissibility of evidence of other crime of which defendant was previously acquitted ................................................................. 14-34
14.285 Fact that other acts evidence concerns defendant's prior conviction[s] of criminal activity does not require analysis under Wis. Stat. § 906.09 (impeachment by evidence of conviction of crime) ......................................................... 14-35
14.286 Admissibility of evidence that does not specifically detail prior crime, wrong or act, but conveys message that prior crime, wrong or act was engaged in, is analyzed under law of "other crimes, wrongs or acts" evidence (see sec. 14.144) ........................................................................................................ 14-35
14.287 Defendant's formal concession of, or stipulation to, element of offense may render evidence relevant to that element inadmissible (see sec. 14.2154) ................................................................................................. 14-35
14.288 Trial court has no authority to grant admission of other acts evidence upon condition that crime or crimes to which other acts evidence relates will not become subject of successive prosecution ......................................................... 14-35
14.289 Other matters ................................................................................ 14-35
14.2891 Trial court’s failure to engage in required analysis for determining admissibility of other-acts evidence does not automatically constitute reversible error ............................................... 14-35

14.29 Other Matters (cont’d) ............................................................................................................ 14-35
14.291 Admission of particular types of other acts evidence ........................................ 14-35
14.2911 Evidence of defendant's possession of firearms and accessories .......................... 14-35
14.2912 Evidence of defendant's possession of manuals on firearms and other dangerous instrumentalities ................................................ 14-35

14.3 Other Matters Relating To Other Crimes Evidence ............................................................. 14-35
14.31 Procedure And Standard Of Proof In Admitting Other Crimes Evidence .................... 14-35
14.311 No need for trial court to make preliminary finding that state has proved other crime by preponderance of evidence or other evidentiary standard .......................... 14-35
14.312 Other crimes evidence admissible if jury could find that defendant committed other crime by preponderance of the evidence ................................................ 14-36
14.313 Prior-crime evidence need not be in form of conviction; evidence of incident, crime or occurrence is sufficient ............................................................. 14-36
14.314 Need to grant defendant continuance when prosecutor provides notice of other crimes evidence only short time before trial commences (see sec. 14.3694) ................................................................. 14-36
14.315 Fact that defendant was acquitted of committing other crime does not bar jury in present case from finding that he committed it ............................................. 14-36
14.316 Trial court is encouraged to address question of admissibility of other crimes evidence pretrial if possible ................................................................. 14-36
14.317 Trial court required to set forth on record its exercise of discretion in admitting evidence .................................................................................................. 14-36

14.32 Admission Of Other Crimes, Wrongs, Or Acts Of Third Parties .................................... 14-36
14.321 Admissibility of other crimes, wrongs, or acts of third party to show that third party committed crime with which defendant charged .......................... 14-36
14.322 Applicability of requirements of sec. 904.04(2) to the admission of evidence of other crimes, wrongs, or acts of third parties ........................................ 14-37
14.323 Defendant's right to claim prejudice from admission of other crimes, wrongs, or acts evidence of codefendant with whom defendant tried ............. 14-37

14.331 Constitutionality of instruction ............................................................................... 14-37
14.332 Need for instruction ................................................................................................. 14-37
14.3321 In general ............................................. 14-37
14.3322 When party fails to request instruction ......................................................... 14-37
14.333 Sufficiency of instruction to cure or dispel prejudice ........................................ 14-37
14.3331 In general ............................................. 14-37
14.3332 Interaction of instruction on other crimes and instruction on use of prior convictions to impeach testifying defendant's credibility does not create confusion and render other-crimes instruction insufficient to cure prejudice ................................................ 14-38
14.334 Effect of incorrect identification of purpose for which evidence was received ................................................................. 14-38
14.335 Effect of instructing jury on uses for which court did not receive other acts evidence ................................................................. 14-38
14.336 Effect of defendant's declining instruction on his or her claim that probative value of other-acts evidence was outweighed by unfair prejudice ................................................................. 14-38

14.337 Effect of failure to give cautionary instruction on question whether probative value of evidence was substantially outweighed by danger of unfair prejudice ................................................................. 14-38

14.338 Trial court's sua sponte inquiry of defense whether cautionary instruction is requested ............................................................................................................. 14-38

14.3381 Desirability of this practice .............................................................................. 14-39

14.34 Waiver Of Objection To Other Crimes Evidence Or Of Right To Complain About Admission Of Other Crimes Evidence On Appeal ................................................ 14-39

14.341 In general ............................................................................................................. 14-39

14.342 By failure to specifically object on basis that evidence constitutes improper other acts evidence .................................................................................. 14-39

14.343 By failing to identify with particularity ground for objection ......................... 14-39

14.344 By agreeing to consolidation of charges that include other crimes that are the subject of evidence to which objection has been made ..................... 14-39

14.345 By entering into stipulation regarding existence of element to which other crimes evidence relates, thereby precluding admission of other acts evidence .................................................................................. 14-39

14.346 Waiver of particular ground for objection by not presenting that
ground to trial court ..................................................................................................... 14-39

14.3461 In general .......................................................................................................... 14-39

14.3462 Waiver of objection to form in which other crimes evidence presented (e.g., by testimony by victim of other crime, rather than by judgment of conviction or stipulation) by failing to object to form in which evidence came in ............................................. 14-39

14.35 Appellate Review Of Trial Court's Decision Admitting Evidence ..................... 14-39

14.351 In general ............................................................................................................. 14-39

14.352 Appellate court's response to trial court's failure to adequately address question of admissibility of other-acts evidence or to adequately explain basis for its ruling ................................................................. 14-41

14.3521 When court fails to specifically perform required balancing of probative value versus prejudicial effect, appellate court may independently review evidence to determine whether it supports trial court's ruling (see sec. 14.277) ............................................. 14-41

14.3522 When trial court fails to adequately explain ruling admitting other-acts evidence, appellate court must independently examine record to determine whether it provides reasonable basis for ruling ............................................................................................................. 14-41

14.3523 Fact that trial court has mistaken view as to proper purpose of other acts evidence that justifies its admission does not require reversal if in fact other proper purpose for its admission exists ............................................................................................................. 14-42

14.3524 Regardless of extent of trial court's reasoning, appellate court will uphold decision if there are facts in record that would support trial court's decision had it fully exercised its discretion ............................................................................................................. 14-42
14.3525  Appellate court's obligation to independently review record and determine if it provides basis for trial court's decision when trial court did not adequately explain basis for decision (see sec. 14.3571) .............................................. 14-42

14.353  Under erroneous-exercise-of-discretion standard applicable in this context, trial court will not be reversed because appellate court would have decided question differently ........................................ 14-42

14.354  If other crimes evidence admissible on particular ground, appellate court need not determine whether it was also admissible on other ground upon which trial court relied ...................................................... 14-42

14.355  Failure to argue particular purpose for admission of other acts evidence in trial court may bar state on appeal from relying on that purpose to justify admission of evidence (see sec. 11.8423) ................. 14-42

14.356  Applicability of harmless error rule (see sec. 14.3611) .............................................. 14-42

14.357  Other matters .............................................................................................................. ... 14-42

14.3571  Appellate court's obligation to independently review record and determine if it provides basis for trial court's decision when trial court did not adequately explain basis for decision .............................................. 14-42

14.3572  When other acts evidence not actually admitted at trial after trial court's pretrial ruling admitting it (e.g., because defendant enters into stipulation that renders evidence inadmissible), defendant cannot complain about trial court's ruling on appeal ........................................................................ 14-42

14.3573  Abuse of discretion in excluding evidence occurs if trial court did not apply correct law ...................................................... 14-43

14.3574  Avoiding necessity to determine admissibility of other-acts evidence by determining that admission of evidence, if error, was harmless .......................................................................................... 14-43

14.3575  Appellate court will reverse only if trial court's decision admitting evidence was one that no reasonable court could make .............................................................................................................. 14-43

14.361  Improper admission of other acts evidence as harmless error .................................. 14-43

14.364  Evidence of character of defendant (see sec. 20.8231) ........................................... 14-43

14.365  Once other crimes evidence admissible, it is admissible in case-in-chief and need not be reserved for rebuttal ...................................................... 14-43

14.366  Constitutional restrictions on admissibility of other-crimes evidence ..................... 14-43

14.367  Fact that admission of other crimes evidence may give rise to future double jeopardy problem is inappropriate factor to be considered when deciding whether to exclude evidence ...................................................................................... 14-44
14.368 Use of other crimes of which defendant was acquitted .......................................................... 14-44
14.369 Other matters ........................................................................................................................................ 14-44

14.3691 State evidentiary rule regarding other crimes evidence is identical in meaning to federal rule relating to other crimes evidence ................................................................................................................ 14-44
14.3692 Defendant's post-crime threats to victim are not other acts evidence governed by Wis. Stat. § 904.04 ................................................................................................................ 14-44
14.3693 Other crimes, wrongs, or acts evidence rule not applicable when prior convictions used for impeachment purposes (see sec. 14.143) .......................................................................................... 14-44
14.3694 Need to grant defendant continuance when prosecutor provides notice of other crimes evidence only short time before trial commences ........................................................................... 14-44

14.3696 Admissibility of evidence that does not specifically detail prior crime, wrong or act, but conveys message that prior crime, wrong or act was engaged in, is analyzed under law of "other crimes, wrongs or acts" evidence (see sec. 14.144) .................................................. 14-44
14.3697 Trial court has no authority to grant admission of other acts evidence upon condition that crime or crimes to which other acts evidence relates will not become subject of successive prosecution (see sec. 14.288) ........................................................................................................ 14-44
14.3698 Fact that defendant was acquitted of committing other crime does not bar jury in present case from finding that he committed it (see sec. 14.315) ........................................................................ 14-44

Hearsay and Its Exceptions

15.1 What Constitutes Hearsay .................................................................................................................. 15-1
15.11 General Principles .......................................................................................................................... 15-1

15.111 Definition of hearsay in general .................................................................................................. 15-1

15.112 As general rule, hearsay is not admissible evidence .................................................................. 15-2

15.1121 In general ........................................................................................................................................ 15-2

15.1122 Exception to general rule exists when hearsay is admissible "as provided . . . by statute" (see sec. 15.67) ................................................................................................................ 15-2

15.113 Statement offered to prove fact other than that asserted in statement, but which would prove that fact only if it itself were true, is hearsay ....................................................................................... 15-2

15.114 To constitute "statement" for purposes of definition of hearsay, "assertion" may be implicit rather than explicit; "assertion" includes expression of fact, opinion, or condition that is implicit in words of utterance as long as speaker intended to express that fact, opinion, or condition ......................................................................................................................... 15-2

16.1415 Effect of mistake as to number of convictions

16.1416 For purposes of impeachment, prior "conviction" occurs upon finding of guilt or entry and acceptance of guilty plea

16.1417 May defendant who preemptively introduces evidence of prior conviction on direct examination, after trial court has ruled that state will be permitted to adduce evidence of prior conviction to impeach testifying defendant's credibility, challenge admission of such evidence on appeal?

16.14171 No (United States Supreme Court's answer)

16.14172 Yes (Wisconsin Court of Appeals' answer)

16.1418 Other matters

16.14181 Prior convictions introduced to impeach credibility of testifying witness are not subject to exclusion under other crimes, wrongs, and acts rule (see sec. 14.143)

16.14182 Limitations on use of defendant's prior conviction(s) to impeach credibility do not apply when conviction(s) introduced for purpose(s) other than impeachment

16.14183 May impeach testifying defendant by proof of prior convictions without violating Fifth Amendment privilege (see sec. 24.896)

16.14184 When erroneous testimony regarding number of prior convictions constitutes harmless error

16.14185 The higher the number of convictions the less credibility on witness's part they may suggest

16.14186 Rule limiting cross-examination about prior convictions to fact and number of convictions does not bar state from introducing evidence of defense witness’s substantial sentences, and lack of any realistic possibility of parole eligibility under them, to impeach witness’s claim that he committed crime with which defendant charged by showing that witness had nothing to lose by making that claim

16.14187 When failure to impeach witness by eliciting number of times witness had been convicted constitutes ineffective assistance of counsel (see sec. 25.3428)

Chapter 18
Scientific Evidence and Expert Testimony

18.1 Scientific Evidence In General .................................................................................. 18-1
18.11 General Test For Determining Admissibility Of Scientific Evidence ........................................ 18-1
18.111 In general ........................................................................................................... 18-1
18.112 Daubert rule (trial court must ensure that scientific evidence is reliable) ........................................ 18-1
18.1121 In general ........................................................................................................... 18-1
18.1122 Wisconsin is not a Daubert state ........................................................................ 18-1
18.113 Reliability of scientific evidence presents question of weight for jury, not question of admissibility .................................................................................................................. 18-1
18.2 Expert Testimony In General

18.21 General Principles

18.211 In general

18.212 Three-part test for determining admissibility of expert testimony: (1) testimony must be relevant; (2) witness must be qualified; (3) testimony must assist trier of fact

18.2121 In general

18.2122 First part of test: relevancy

18.2123 Second part of test: qualifications (see sec. 18.22)

18.2124 Third part of test: assistance

18.213 Testimony expressed in terms of possibility

18.214 When expert testimony required to render evidence admissible

18.215 Analysis that must be undertaken when defendant claims he has constitutional right to adduce expert testimony in his defense (see sec. 28.41)

18.216 Unreliability of expert testimony is matter for cross-examination, not basis for exclusion; reliability of expert testimony is issue for trier of fact, not for circuit court as predicate to admissibility: reliability of expert testimony presents question of weight for jury, not question of admissibility

18.217 "Gatekeeping" function of trial court with respect to admission of expert testimony

18.2171 In general

18.2172 Daubert rule (trial court must ensure that expert testimony is reliable)

18.21721 In general

18.21722 Wisconsin is not a Daubert state

18.218 Need for expert opinion to be based on professional standards, not personal practice

18.219 Other matters

18.2191 Opinion may be based on experience alone

18.2192 Expert testimony not objectionable because it embraces ultimate issue to be decided by tried of fact (see sec. 18.232)

18.2193 May witness testify as expert on issue of domestic law, which is province of court?

18.22 Qualification Of Witness As Expert

18.221 In general

18.222 Psychologist need not be licensed in Wisconsin in order to testify in ch. 980 proceeding (see sec. 10.78292)

18.223 Fact that expert has lied about credentials or other matters or has engaged in unprofessional conduct does not necessary require court to disregard or strike expert's testimony

18.224 In determining whether expert qualified, court must compare technical expertise of witness to complexity of precise issue in case

In general ............................................................................................................. ...... 19-14
19.1382 Discrepancies in testimony at trial, or between trial testimony and prior statements or testimony, do not render testimony incredible as matter of law .................................................... 19-15

19.139 Other principles and related matters ................................................................. 19-15

19.1391 Weight and credibility of evidence does not depend on number of witnesses who testify in favor of or against existence of particular fact ........................................................................... 19-15

19.1392 Jury may believe some of testimony of one witness and some of testimony of another witness even though their testimony, read as a whole, may be inconsistent ......................................... 19-15

19.1393 Determinations of witness credibility are generally resolved by live testimony (see sec. 12.79411) ........................................................................................................ 19-15

19.151 Factual disputes to be resolved in light most favorable to verdict .................... 19-16

19.154 General standards for appellate review of fact finding (see sec. 11.62) ............. 19-16

19.155 In considering sufficiency of evidence, court must consider all evidence submitted, including that erroneously admitted (see sec. 19.582) .......................................................................................................................... 19-16

19.156 Drawing of, and use of, inferences to sustain sufficiency of evidence to convict .................................................................................................................. 19-16

19.1561 When record supports more than one inference, reviewing court must accept inference drawn by trier of fact, i.e., inference that supports jury's verdict .................................................. 19-17
19.1562 Reviewing court will give evidence all reasonable inferences that will support verdict .................................................. 19-17

19.1563 If trier of fact could possibly have drawn appropriate inference to find guilt, appellate court will not overturn verdict even if it believes trier of fact should not have found guilt ................................................................. 19-17

19.1564 Use of particular inferences to sustain sufficiency of evidence (see sec. 19.4) .......................................................... 19-17

19.1565 When record supports conflicting inferences, reviewing court must presume—even if it does not affirmatively appear in record—that trier of fact resolved conflict in favor of prosecution, and must defer to that resolution .................................. 19-17

19.157 When evidence is conflicting, resolution of conflicts is for jury .................................................. 19-17

19.159 Test for sufficiency of evidence applicable in criminal proceeding also applies on appeal from ch. 980 commitment .................................................. 19-17

19.16 Other Principles (cont’d) ........................................................................................................ 19-17

19.161 That evidence was overwhelming may be evidenced by short time jury deliberated after multi-day trial .................................................. 19-18

19.162 Use of "negative inference" to sustain finding of particular factual proposition: fact finder's right to affirmatively conclude that truth is opposite of witness's incredible testimony .................................................. 19-18

19.163 Trier of fact may not base findings on conjecture or speculation; verdict cannot be based on conjecture and speculation .................................. 19-18

19.164 Questions of statutory interpretation encountered when assessing sufficiency of evidence to convict (e.g., meaning of terms used in describing elements of offense) are questions of law that appellate court reviews de novo .................................................. 19-18

19.165 Appellate court will not find evidence insufficient because witness fails to describe event in exact chronological fashion; rather, it will leave it to the jury to listen to testimony and determine what happened .................................................. 19-18

19.166 Fact finder may draw logical inferences from evidence, connecting its dots into coherent pattern (see sec. 20.293) .................................................. 19-18

19.167 Although there is some evidentiary leeway in trials to court, bench-trial judges may not use inadmissible evidence to decide "critical issue" (see sec. 8.89651) .................................................. 19-18

19.168 Appellate court must search record to support conclusion reached by fact finder .................................................. 19-18

19.561 In general ........................................................................................................ 19-25
19.562 In assessing whether constitutional violation has occurred because
evidence was allegedly insufficient to convict, court may only assess
evidence introduced at trial; consideration of evidence adduced post-
trial, casting doubt on evidence adduced at trial, is inappropriate ................. 19-26
19.563 It is not error to cast test of sufficiency of evidence in terms of
"reasonable" jury, rather than "rational" one, and that asks whether
jury could be convinced of defendant's guilt, rather than whether it
could be convinced of each element of crime ..................................................... 19-26
19.564 In assessing whether constitutional violation has occurred because
evidence was allegedly insufficient to convict, court must review
evidence in light most favorable to prosecution ............................................... 19-26

19.5711 Propriety of fact finder considering defendant's perjury as affirmative evidence of guilt ................................................................. 19-26

19.5712 Propriety of predicing finding of guilt simply on disbelief of defendant's testimony ........................................................................... 19-26

19.572 Requirement that appellate court consider sufficiency of evidence even though other errors warranting reversal are found (see sec. 29.4412) ....................................................................................................................... 19-27

19.576 Sufficiency of evidence is question of law (see sec. 19.116) ................................ 19-27

19.5772 When jury was not instructed on lesser-included offense ............................... 19-28

19.578 Reversal because conviction against weight of evidence .................................. 19-28

19.579 When trial court, sitting as fact finder, predicates defendant's guilt of crime (e.g., crime of bail jumping) on jury's finding of guilt of another crime, and jury's verdict is overturned, evidence is, as matter of law, insufficient to support defendant's conviction ........................................................................... 19-28

19.58 Other matters (cont'd) ........................................................................................... 19-28

19.581 Sufficiency of stipulation to establish element of offense ........................................ 19-28

19.587 When statute creating offense provides that it does not apply to certain constitutionally protected conduct, fact that conduct is not constitutionally protected does not become element of offense that state must prove ........................................................................................................ 19-29

19.588 Defendant's admission of existence of particular element dispenses with the need for proof of that element, either to a judge or to a jury .............. 19-29

19.589 Use of "negative inference" to sustain finding of particular factual proposition: fact finder's right to affirmatively conclude that truth is opposite of witness's incredible testimony (see sec. 19.162) ........................................... 19-29

19.59 Other Matters (cont'd) ............................................................................................................ 19-29

19.591 No need to raise question of sufficiency of evidence to convict in trial court to preserve issue for appellate review ......................................................... 19-29

19.592 Use of judicial notice to provide sufficient evidence to convict ......................... 19-29

19.593 Consideration of trial court's comments in later proceeding (e.g., sentencing) in determining whether earlier finding of guilt when trial court was acting as fact finder at trial is sustainable ........................................... 19-29

19.594 Waiver of challenge to sufficiency of evidence to convict: defendant does not waive right to challenge sufficiency of evidence by failing to raise issue in trial court by way of motion to dismiss, motion for directed verdict, etc. (see sec. 19.591) ................................................................................................................... 19-29

19.595 Effect of court decision in another case, decided after defendant's conviction became final, holding that conduct in which defendant engaged does not constitute crime of which he was convicted ............................... 19-29

19.5951 In general (see sec. 30.3861) ......................................................................................... 19-29

19.5952 Need for court that decided case to determine whether decision declared law that existed at time defendant's conviction became final or, rather, changed law from that which existed at time defendant's conviction became final (see sec. 30.3862) ........................................................................................................... 19-29

19.596 Whether evidence is sufficient presents question of law (see sec. 19.115) ......................................................................................................................... 19-29

19.597 Remedy when court finds evidence insufficient to support conviction: entry of judgment of acquittal, not new trial ........................................................................ 19-30

21.1211 In general ............................................................................................................. 21-1
21.1212 Generally, Wisconsin Supreme Court has interpreted
provisions of Wisconsin Constitution consistent with United
State's Supreme Court's interpretation of their counterparts
in federal constitution ....................................................................................................... 21-1
21.122 Relationship between particular constitutional rights (see sec. 21.56) ................. 21-1

21.4121 In general ..................................................................................................... 21-7

21.4122 Waiver is ordinarily considered knowing and intelligent if defendant is aware of right being waived and how it would likely apply in general, even though defendant may not know specific detailed consequences of invoking it ........................................ 21-7

23.112 Legislature may choose to address one evil at a time ...................................... 23-2
23.113 Statute does not violate equal protection because it is underinclusive .............. 23-2
23.114 Legislature may determine which crimes are in need of more urgent
   repression than others ......................................................................................... 23-2
23.115 Mere inequity, standing alone, cannot serve as basis for equal
   protection complaint ........................................................................................ 23-2
23.116 Court's obligation to locate or construct rationale for statutory
   classification ........................................................................................................ 23-2
23.117 Legislature not required to choose best or wisest means to achieve its
   goals .................................................................................................................... 23-2
23.12 Equal Protection Tests ....................................................................................... 23-2
23.121 In general ....................................................................................................... 23-2
23.122 When confronted with equal protection challenge, court must first
   determine which test is applicable (i.e., which level of judicial
   scrutiny is required) ......................................................................................... 23-2
23.123 Traditional (rational relationship) test .............................................................. 23-3
23.1231 In general ................................................................................................... 23-3

23.12536 After criminal conviction, there is no fundamental right, triggering strict scrutiny, to be free from deprivations of liberty (i.e., sentencing) as a result of arbitrary distinction, so long as arbitrary distinction does not violate due process ................................................................................................................................. 23-8
23.12537 Invoking right to present defense to trigger strict scrutiny ..................................................................................... 23-8

23.153 Legislature's elimination of distinction in statute that is challenged as violative of equal protection is not indication that distinction lacked rational basis ................................................................................................................................................................................................. 23-8
23.154 Statute does not violate equal protection merely because it is not all-embracing; legislature may recognize degrees of harm and confine restrictions to those classes of cases where need is deemed clearest .......... 23-8

23.155 Legislature may address one phase of problem and neglect others ................. 23-9

23.156 Is it irrational, and therefore a violation of equal protection, to prescribe greater punishment for less serious offense than is prescribed for more serious offense? ......................................................... 23-9

Chapter 25
Right To Counsel

25.1 When Counsel Required 25-1
25.11 General Principles 25-1
25.111 In general 25-1
25.112 When right to counsel attaches in criminal prosecution 25-2
25.1121 In general 25-2
25.1122 Right to counsel attaches when warrant is issued or complaint is filed 25-3
25.1123 When no warrant issued or complaint filed, right to counsel attaches at defendant’s initial appearance before judicial officer, where he learns accusation against him and his liberty is subject to restriction 25-3
25.11231 In general 25-3
25.11232 Attachment does not require that prosecutor (as distinct from police officer) be aware of initial proceeding or involved in its conduct 25-3
25.113 Attachment of right to counsel on one charge does not give rise to right to counsel on other, uncharged offense 25-3
25.1131 General rule: right to counsel is offense-specific; applies only to charged offense ....................................................................................... 25-3

25.1132 Is there an exception to general rule where other, uncharged offense is "closely related" to offense on which right to counsel has attached? ................................................................................. 25-3

25.11321 No (United States Supreme Court's answer) ........................................ 25-3

25.11322 Yes (Wisconsin Court of Appeals' answer) ...................................... 25-3

25.1133 Determination of whether offense has been charged is to be determined by applying the Blockburger test ........................................................................................................... 25-3

25.1134 Deliberate delay in charging to avoid sixth amendment right to counsel ........................................................................................................................... 25-3

25.114 Attachment of right to counsel in juvenile delinquency proceeding (see sec. 25.191) ........................................................................................................................... 25-4

25.115 Under federal constitution, defendant charged with misdemeanor has no constitutional right to counsel unless sentence of imprisonment is imposed ............................................................................................................................. 25-4

25.1151 In general ............................................................................................................................. 25-4

25.1152 Right to counsel attaches if sentence of imprisonment is imposed even though sentence is suspended or stayed .............................................................................................................................. 25-4

25.116 Sixth Amendment right to counsel applicable to states ........................................................................................................................... 25-4

25.117 Sixth Amendment right to counsel does not attach in civil proceedings ........................................................................................................................... 25-4

25.1352 When statement elicited by government agent before charges filed (see sec. 2.3142) ............................................................................................................................. 25-5

is harmless error ................................................................................. 25-5

25.1721 In general .................................................................................................................................... 25-7
25.1722 In death penalty cases ................................................................................................................ 25-7
25.1723 Fact that probation not revoked until after time for filing

    25.1986 In refusal revocation proceeding (i.e., proceeding seeking revocation of driver's license because of refusal to consent to blood-alcohol testing) (see sec. 44.4124) .............................................................. 25-10

25.2 Ineffective Assistance Of Counsel: General Principles .............................................. 25-10
  25.21 Right to, And Test For Determining Whether Defendant Received, Effective Assistance Of Counsel .............................................................. 25-10
25.211 Right to effective representation in general .......................................................... 25-11
25.2111 In general ................................................................................................... 25-11
25.2112 Where statutory right to counsel exists, right includes right
to effective counsel (see sec. 25.2895) ............................................................. 25-11
25.2113 Right extends to closing argument ......................................................... 25-11
25.2114 Right exists under state constitution ..................................................... 25-11

25.212 Two-prong test for determining adequacy of representation:
defendant must show deficient performance and prejudice ....................... 25-12
25.2121 In general ................................................................................................... 25-12
25.2122 Burden of proof with respect to two prongs of test .................. 25-19
25.2123 Test applies when defendant convicted on guilty plea .......... 25-19
25.2124 Defendant must satisfy both prongs to succeed on claim of
ineffective assistance of counsel; if defendant fails to meet
either prong, ineffective-assistance-of-counsel claim fails .......... 25-19
25.2125 Defendant must prevail on both parts of test to be afforded
relief ........................................................................................................... 25-19
25.2126 Two-prong test has been adopted by Wisconsin Supreme
Court ........................................................................................................... 25-19

25.213 First prong of test: deficient performance ............................................................. 25-19
25.2131 In general ................................................................................................... 25-19
25.2132 Judicial review of counsel's performance must be highly
deferential; there is a strong presumption that counsel acted
reasonably within professional norms ................................................... 25-22
25.2133 Counsel not required to argue point of law that is unsettled .......... 25-24
25.2134 Test for deficient performance is not legal correctness of
counsel's judgments, but rather their reasonableness .......... 25-24
25.2135 Other matters ............................................................................................. 25-24
25.21351 Counsel not required to have total and complete
knowledge of all aspects of reported criminal law,
no matter how obscure .............................................................................. 25-24
25.21352 Counsel not required to raise every available
nonfrivolous defense, regardless of its merit,
viability, or realistic chance for success ........................................... 25-24
25.21353 Counsel is not required to have tactical reason—
above and beyond reasonable appraisal of claim's
dismal prospects for success—for recommending
that weak claim be dropped altogether ........................................... 25-24
25.21354 When counsel recommends that defendant
abandon particular defense (e.g. plea of insanity)
and defendant does so, counsel will not be found
ineffective simply because defendant "had
nothing to lose" by continuing to pursue that
defense ....................................................................................................... 25-24
25.21355 Competence does not require attorney to
browbeat reluctant witness into testifying ...................................... 25-25
25.2136 Other matters (cont’d) ............................................................................. 25-25
25.21361 Counsel's performance should be judged in light
of law at time counsel acts; counsel not required
to anticipate change in law ............................................................... 25-25
25.21362 Failure to file, pursue, or make meritless motion, legal challenge, objection, or argument does not constitute deficient performance; if motion, challenge, objection, or argument would have been unsuccessful, trial counsel is not deficient for not filing, pursuing, or making it ......................................... 25-25

25.21363 Failure to argue issue on appeal that is waived is not ineffective assistance of counsel ........................................ 25-26

25.21364 In assessing whether performance was deficient, reviewing court may rely on reasoning that trial counsel overlooked or even disavowed ........................................ 25-26

25.21365 Counsel will not be found deficient for failing to discover information that was available to defendant, but defendant failed to share with counsel ..................................................................................... 25-26

25.21366 Reviewing court will not second guess counsel's selection of trial tactics or strategies in face of alternatives that counsel has considered ........................................ 25-26

25.21367 Must judge reasonableness of counsel's conduct based on facts viewed as of time of counsel's conduct ..................................................................................... 25-26

25.21368 Strategic choices, made after thorough investigation of law and facts, are virtually unchallengeable; court will uphold counsel's strategic decision if it was rationally based on facts and law; reasonable trial strategy is virtually unassailable ........................................ 25-26

25.21369 Failure to raise an issue of law is not deficient performance if legal issue is later determined to be without merit ..................................................................................... 25-26

25.2137 Other matters (cont'd) ................................................................. 25-26

25.21371 "Counsel need not be perfect, indeed not even very good, to be constitutionally adequate" .......................... 25-26

25.21372 Trial counsel expected to know law relevant to defendant's case (see sec. 25.2241) ............................ 25-27

25.21373 Claim of deficient performance based on failure to preserve issue for appellate review need not be considered if appellate court addresses, and rejects defendant's claim relating to, that issue on its merits (see sec. 25.275) ........................................ 25-27

25.21374 Labeling counsel's action as "strategic" does not insulate it from finding of deficient performance .................... 25-27

25.21375 Burden of proof on question of deficient performance ..................................................................................... 25-27

25.21376 Challenge to counsel's performance must be based on more than speculation ........................................ 25-27

25.21377 Reasonableness of counsel's actions may be determined or substantially influenced by defendant's own statements or actions ........................................ 25-27
25.21378 Test is whether counsel's performance was "objectively" reasonable .......................................................... 25-27

25.21379 Counsel's testimony that his decision was not product of reasoned strategy, but rather of inadvertence or mistake, is not dispositive of question of deficient performance ........................................... 25-27

25.2138 Other matters (cont'd) .............................................................................. 25-27

25.21381 Defense counsel may select particular defense from available alternative defenses and is not required to present jury with alternatives inconsistent with chosen defense ................................................. 25-28

25.21382 Sixth Amendment guarantees reasonable competence, not perfect advocacy ................................................. 25-28

25.21383 Even if it appears in hindsight that another defense would have been more effective, counsel's strategic decision will be upheld as long as it is founded on rationality of fact and law ........................................... 25-28

25.21384 Appellate court will uphold counsel's strategic decision if it was rationally based on facts and law ........................................................................................................... 25-28

25.21385 Counsel not required to cooperate in defendant's attempt to perpetrate fraud on court ................................................. 25-28

25.21386 When defendant alleges that counsel was ineffective for failing to take certain steps, defendant must show with specificity what the actions, if taken, would have revealed and how they would have altered the outcome of the proceedings (see sec. 25.2673) ........................................................................................................... 25-28

25.21387 Ignorance of well-defined legal principles is nearly inexcusable ................................................................................................. 25-28

25.21388 Because lawyer's performance is evaluated under prevailing professional norms, case law and treatises on legal malpractice can be instructive ................................................. 25-28

25.21389 Defendant not entitled to ideal, perfect defense or best defense, only reasonably effective representation ........................................................................................................... 25-28

25.2139 Other matters (cont'd) .............................................................................. 25-28

25.21391 Use of ABA Standards, and other statements of professional standards, to determine what is reasonable performance ........................................................................................................... 25-28

25.21392 In determining whether there was deficient performance, court may consider reasons trial counsel overlooked or disavowed ................................................................................... 25-29

25.21393 Counsel's right to choose strategy and to select particular defense from available alternative defenses (see sec. 25.218) ........................................................................................................... 25-29

25.21394 Failure to object to objectionable evidence may not be deficient performance if counsel did not object because he or she did not want to draw unwarranted attention to evidence ........................................................................................................... 25-29
25.21395 Deficient performance is limited to situations where law or duty is clear such that reasonable counsel should know enough to raise issue ....................... 25-29
25.21396 Attorney’s experience is not criterion for determining whether representation was effective in particular case ........................................................................... 25-29
25.21397 When prior decisions reveal that action that defense counsel is being faulted for not taking has occurred only once before, court cannot say failure to take that action fell below prevailing professional norms ................................................................. 25-29
25.21398 Defense counsel is not kept from providing effective assistance at preliminary examination by refusal to permit him to subpoena police reports and other non-privileged investigatory materials for examination and copying in anticipation of preliminary examination ................................................................. 25-29

25.2141 General principles ..................................................................................... 25-29
25.21411 In general ................................................................................. 25-29
25.21412 When multiple deficiencies in counsel’s performance found, prejudice should be assessed based on cumulative effect of those deficiencies ............. 25-34
25.21413 To be included in calculus for prejudice, each act or omission must fall below objective standard of reasonableness ................................................................. 25-34
25.21414 In determining prejudice, must consider totality of evidence ................................................................................... 25-34
25.21415 When defendant contends that he will be prejudiced in future by some court rule or ruling, he must demonstrate that he would be prejudiced per se ................................................................................ 25-34

25.2142 When prejudice is and is not conclusively presumed, i.e., when particular defect in counsel's performance is and is not deemed prejudicial as matter of law ................................................................................ 25-34
25.21421 In general ................................................................................. 25-35
25.21422 When counsel fails to object to material and substantial breach of plea agreement as to sentencing recommendation (see sec. 25.3822) .................. 25-35
25.21423 When attorney fails to present known evidence calling into question defendant's competency to stand trial ................................................................. 25-35
25.21424 Actual or constructive denial of assistance of counsel altogether; complete denial of counsel at critical stage of proceeding ................................................................. 25-35
25.21425 When counsel's deficient performance has denied defendant a judicial proceeding (e.g., appeal) to which he is entitled ................................................................. 25-35
25.21426 Failure to timely file notice of appeal or otherwise deprive defendant of direct appeal ................................................................................ 25-36
25.21427 Failure to object to instruction that is lacking essential element of crime .............................................................. 25-36

25.2143 When prejudice is and is not conclusively presumed, i.e., when particular defect in counsel's performance is and is not deemed prejudicial as matter of law (cont'd) ..................................................... 25-36

25.21431 Counsel entirely failed to subject prosecution's case to adversarial testing .............................................................. 25-36

25.21432 Counsel was called upon to render assistance under circumstances where competent counsel very likely could not .............................................................. 25-36

25.21433 When counsel had active conflict of interest .............................................................................................................. 25-36

25.21434 When counsel concedes guilt in capital (i.e., death penalty) case, so as to preserve credibility for penalty phase) .............................................................................................................. 25-36

25.2144 When prejudice not presumed ................................................................................................................................. 25-36

25.21441 Prejudice not presumed when counsel fails to object to denial of requisite number of peremptory strikes .............................................................. 25-36

25.21442 Prejudice not presumed when counsel fails to file timely request for substitution of judge .............................................................. 25-36

25.21443 Prejudice not presumed when counsel fails to object to oral questioning by jurors or to make offer of proof of follow-up questioning that was not permitted .............................................................. 25-36

25.21444 Prejudice not presumed when appellate counsel performs deficiently by failing to find arguable issues to appeal and, instead, filing no-merit report .............................................................. 25-37

25.21445 Prejudice not presumed when counsel fails to file notice of appeal where defendant has not expressed wishes one way or another on question whether appeal should be filed .............................................................. 25-37

25.21446 Prejudice not presumed when counsel has failed to object to six-person jury, thereby depriving defendant of state constitutional right to twelve-person jury .............................................................. 25-37

25.21447 Prejudice not presumed when counsel fails to object to denial of requisite number of peremptory strikes .............................................................. 25-37

25.21448 Prejudice not presumed when defense counsel improperly shifts from question-answer to narrative format in eliciting defendant's testimony .............................................................. 25-37

25.21449 Prejudice not presumed when counsel fails to make Batson objection (see sec. 25.33221) .............................................................. 25-37

25.2145 When prejudice not presumed (cont'd) .............................................................. 25-37

25.21451 Prejudice not presumed when counsel fails to object to judge's possible violation of authority to call and interrogate witnesses .............................................................. 25-37
25.21452 Prejudice not presumed when counsel fails to object to denial of public trial ................................................. 25-37
25.21453 Prejudice is not presumed when defense counsel is denied right to subpoena police reports and other non-privileged investigatory materials for examination and copying in anticipation of preliminary examination ....................................................... 25-37
25.21456 Prejudice when defects affect defendant's right to appeal ...................................................... 25-37
25.21461 When ineffective assistance deprives defendant totally of right to appeal ........................................................ 25-37
25.21462 When defendant's counsel fails to pursue appeal .................................................................................. 25-38
25.21463 Complete denial of appellate counsel .......................................................................................... 25-38
25.2147 Burden of proof on question of prejudice .................................................................................. 25-38
25.21471 In general .......................................................................................................................... 25-38
25.21472 Defendant bears burden of showing prejudice under both the federal and state constitutions ...................................................... 25-38
25.2148 Applicability of prejudice prong to particular defects in counsel's performance .......................... 25-38
25.21481 Keeping defendant off stand in violation of his right to testify in own defense ...................................................... 25-38
25.21482 Waiver of Batson violation .................................................................................. 25-38
25.2149 Other matters (cont'd) .................................................................................................................. 25-38
25.21491 Failure to timely pursue pretrial motion is not prejudicial if motion would have been properly denied on merits .......................................................... 25-38
25.21492 Failure to raise issue or legal challenge is not prejudicial if defendant's position on that issue is found to be wrong or legal challenge would have been unsuccessful .................................................................................. 25-38
25.21493 Failure to make argument is not prejudicial if argument would have been unsuccessful .......................................................... 25-38
25.21494 To show prejudice, more than mere speculation is required; when defect in counsel's performance is failure to present evidence, that evidence must be fully developed at hearing in trial court .......................................................... 25-38
25.21495 Although there are a few situations in which overriding focus on fundamental fairness may affect analysis, separate inquiry into fundamental fairness not appropriate when ineffectiveness of counsel deprives defendant of substantive or procedural right to which law entitles him .................................................................................. 25-39
25.21496 Determining when prejudice exists with respect to defects in counsel's performance that do not affect trial and its outcome: counsel's failure to seek enforcement of, or to inform defendant of right to seek enforcement of, plea agreement with which prosecutor has refused to comply (see sec. 25.3964) .................................................................................................................. 25-39
25.21497 When deficient performance directly results in increase in sentence over what it would have been, prejudice prong of test does not require that increase must meet a standard of significance ............ 25-39

25.21498 When there is strong evidence supporting verdict, it is less likely defendant can prove prejudice ............ 25-39

25.21499 Verdict only weakly supported by record is more likely to have been affected by errors than one with overwhelming record support ........................................ 25-39

25.215 Second prong of test: prejudice (cont'd) ................................................................ 25-39

25.2151 In determining prejudice, defendant has no entitlement to luck of lawless decision maker; must assume that decision-maker would reasonably and impartially decide case; assessment of prejudice should not depend on idiosyncrasies of particular decision-maker ....................... 25-39

25.21512 For purpose of test for prejudice, does "result" refer to judgment of conviction or sentence? ...................... 25-40

25.21513 Comparison of test for prejudice and test for harmless error (see sec. 11.7141) ........................................... 25-40

25.21514 Defendant not prejudiced unless ineffectiveness deprives him of substantive or procedural right to which law entitles him; likelihood of different outcome attributable to incorrect interpretation of law that was accepted at the time of defendant's trial should be regarded as potential "windfall" to defendant rather than legitimate "prejudice" ..................... 25-40

25.21515 When decision upon which defendant bases claim of prejudice, which was controlling law at time of alleged ineffective assistance of counsel, is later overruled, prejudice is removed ........................................ 25-40

25.21516 Does prejudice result from failure to object to prosecutor's breach of agreement as to sentencing recommendation when trial court did not rely on recommendation? (see sec. 25.3823) ........................................... 25-40

25.21517 When claimed deficiency in counsel's performance relates to charge on which defendant was acquitted, defendant cannot demonstrate prejudice .......................................................... 25-40

25.21518 Test for prejudice when conviction based on guilty plea: when guilty plea entered, defendant must show that he would not have pled guilty if lawyer performed effectively in order to make out claim of prejudice .......................................................... 25-40

25.21519 Determining prejudice when defendant has rejected plea bargain as result of faulty advice of counsel, but has received fair trial ........................................... 25-40

25.2152 Other matters (cont'd) ................................................................................ 25-41
25.21521 In assessing prejudice, may consider success of challenged strategy on counts on which defendant was acquitted ................................................. 25-41

25.21522 When defendant alleges that counsel was ineffective for failing to take certain steps, defendant must show with specificity what the actions, if taken, would have revealed and how they would have altered the outcome of the proceedings (see sec. 25.2673) .............................................. 25-41

25.21523 Federal court's assessment, on federal habeas corpus, of whether state court applied correct test of prejudice: general principles governing assessment ................................................................. 25-41

25.21524 Federal court's assessment, on federal habeas corpus, of whether state court applied correct test of prejudice: particular assessments .............................................. 25-41

25.21525 When claimed deficient performance is failure to adequately question prospective juror on voir dire to uncover bias, test of prejudice is whether counsel's performance resulted in seating of biased juror, not whether differently composed jury would have acquitted defendant (see sec. 25.3342) ..................................................................................... 25-41

25.21526 Appropriateness of trial court, which acted as fact finder at proceeding, concluding that, had alleged deficient performance not occurred, it would not have altered decision ........................................................................ 25-41

25.21527 When claimed deficiency is failure to move to suppress out-of-court identification, but in-court identification would have been admissible even if out-of-court identification should have been suppressed, there is no prejudice (see sec. 25.31382) ................................................................................... 25-41

25.21528 To show prejudice, more than mere speculation is required; when defect in counsel's performance is failure to investigate, what investigation would have revealed must be fully developed at hearing in trial court ...................................................................................... 25-41

25.21529 Defendant is not prejudiced when defense counsel is denied right to subpoena police reports and other non-privileged investigatory materials for examination and copying in anticipation of preliminary examination ........................................................................ 25-42

25.2153 Other matters (cont'd) ...................................................................................... 25-42

25.21531 When alleged deficiency in counsel's performance relates to count on which defendant was acquitted, prejudice is lacking .............................................. 25-42
When deficient performance is failure to present certain evidence in defendant's defense, determination of prejudice requires consideration of evidence that state would be permitted to adduce in rebuttal .......................................................... 25-42

Need to consider one prong of test when court finds other prong not satisfied ..................................................................................................................... .. 25-42

In general ................................................................................................... 25-42

Counsel may have obligation to make sentencing argument, or to withdraw from case, when defendant orders counsel not to make sentencing argument ................................................................................................................................. 25-46

Whether defendant's instruction to follow particular course of action precludes attack on counsel’s following that course of action depends on whether defendant’s decision to issue that instruction was informed by counsel’s advice regarding it ................................................................................................................................. 25-46
25.21965 Counsel may have obligation to withdraw as counsel rather than to follow defendant's instruction ................................................................. 25-46

25.2199 Other matters ........................................................................................................ 25-47

25.21992 When defendant's right to effective assistance of counsel on appeal is denied by state's post-trial destruction of evidence that was not introduced at trial, but which defendant claims is exculpatory .......... 25-47

25.21993 Appellate court is obligated to review ineffective assistance of counsel claims based on law in place at time of appeal .................................................................................. 25-47

25.21994 When failure to adequately investigate alleged, defendant must allege with specificity what investigation would have revealed and how it would have altered outcome (see sec. 25.2672) ........................................................................ 25-47

25.21995 When defendant alleges that counsel was ineffective for failing to take certain steps, defendant must show with specificity what the actions, if taken, would have revealed and how they would have altered the outcome of the proceedings (see sec. 25.2673) .................................................................................. 25-47

25.21996 When defendant alleges that trial counsel was deficient for failing to present testimony, defendant just allege with specificity what particular witness would have said if called to testify (see sec. 25.2674) ........................................................................ 25-47

25.21997 When defendant contends his counsel was ineffective for failing to raise particular issue, and appellate court reviews merits of that issue and finds it without merit, it follows that claim of ineffective assistance of counsel is also without merit .................................................................................. 25-47

25.2341 Court of appeals' rule, overturned by supreme court: in serial representation case, conflict of interest exists, warranting reversal even in absence of evidence of actual conflict or of prejudice to defendant or state ........................................ 25-53

25.2342 Supreme court's rule: in serial representation case, defendant who did not raise objection at trial must demonstrate by clear and convincing evidence that counsel converted potential conflict of interest into actual conflict of interest by (1) knowingly failing to disclose trial attorney's former prosecution of defendant, or (2) representing defendant in manner that adversely affected defendant's interests ........................................ 25-54

25.2343 When serial representation made known to trial court prior to representation at court proceedings .................................................. 25-54

25.23511 When reverse serial representation made known to trial court prior to representation at court proceedings, test is whether the prior representation and present representation are "substantially related" ............................................................ 25-54

25.23512 Motion raising objection before trial may be denied on grounds of untimeliness ........................................... 25-54

25.23514 Propriety under particular circumstances of denying motion raising objection prior to trial on grounds of untimeliness ................................................................................... 25-54

25.23515 Substantial relationship test does not require defendant to show that confidential information relevant to present prosecution was actually communicated to prosecutor in prior proceeding; it is sufficient if prosecutor could have obtained confidential communication .................................................. 25-55

25.23516 When motion raising objection was made before trial, but denied on account of untimeliness, test to be applied when objection is raised in postconviction proceedings is test applicable when objection was not raised prior to trial, i.e., did actual conflict of interest exist ........................................ 25-55

25.239 Other matters ................................................................................................................................................... 25-55

25.2391 Insofar as defendant’s entitlement to relief is concerned, different rules apply depending upon whether conflict was made known to trial court before representation occurred or whether conflict was first discovered or brought to trial court’s attention after representation occurred ................................................................. 25-56

25.2392 Waiver of conflict ........................................................................................................................................... 25-56

25.23921 In general ........................................................................................................................................... 25-56

25.23922 Court may reject waiver of conflict and disqualify counsel, thus overriding defendant’s counsel of choice (see sec. 25.516) ........................................................................... 25-56

25.23923 While courts may deny waiver of conflict of interest, and thus override defendant’s choice of counsel, nothing requires courts to do so ....................................................................................... 25-56

25.23924 When defendant waives right to conflict-free representation, can he or she later contend that he or she received ineffective assistance of counsel as result of conflict? (see sec. 25.2393) ............................................................... 25-56

Chapter 27
Right to Confrontation

27.1 General Principles Relating To Right To Confrontation ................................................................. 27-1
27.11 In General ........................................................................................................................................................................ 27-1

27.13 Federal And State Constitutional Guarantee Equivalent .............................................................................................. 27-2
27.131 In general ....................................................................................................................................................................... 27-2

27.16 What Right To Confrontation Does Not Do .............................................................................................. 27-3
27.161 Does not require state to produce any particular witness ...................................................................................... 27-3
27.162 Does not require pretrial access to witness, witness's personal data (e.g., address), or witness's history (see sec. 27.466) ...................................................................................... 27-3
27.163 Does not necessarily confer right to discovery of otherwise privileged information (see sec. 27.467) ...................................................................................... 27-3
27.164 Does not necessarily guarantee absolute right to face-to-face confrontation with testifying witness in all cases ...................................................................................... 27-3
27.17 Purposes Of Confrontation Clause ................................................................................................................................. 27-4
27.18 Other Principles ................................................................................................................................................................... 27-4
27.181 Confrontation Clause does not require that defendant have confronted declarant at time statement state seeks to introduce into evidence was made; it only requires that defendant have opportunity to confront declarant at some point, e.g., trial ...................................................................................... 27-4
27.182 Confrontation guaranteed by state constitution ................................................................................................................................. 27-4
"Necessities of trial and adversary process" provide no basis for relaxing requirements of confrontation clause .......................................................... 27-4

27.214 Videotaped statements of children ........................................................................... 27-5

27.22 Out-Of-Court Statements Of Nontestifying Declarant .................................................. 27-5

27.221 General principles ........................................................................................................... 27-5

27.2211 In general ..................................................................................................... 27-5

27.2212 Old rule recognized in Roberts: unavailable witness's out-of-court statement is admissible so long as it has adequate indicia of reliability — i.e., falls within firmly rooted hearsay exception or bears particularized guarantees of trustworthiness ........................................................................................................... 27-7

27.22121 In general ..................................................................................................... 27-7

27.22122 Continuing applicability, after Crawford, of Roberts rule to nontestimonial hearsay statements: Wisconsin decisions holding that it has continuing applicability ........................................................................................................... 27-7

27.22123 Continuing applicability, after Crawford, of Roberts rule to nontestimonial hearsay statements: United States Supreme Court decisions suggesting that it does not have continuing applicability ........................................................................................................... 27-7

27.2213 New rule recognized in Crawford: where testimonial evidence is at issue, confrontation clause demands unavailability and prior opportunity for cross-examination ........................................................................................................... 27-8

27.22131 In general ..................................................................................................... 27-8

27.22132 What constitutes "testimonial evidence" for purposes of this rule (see sec. 27.2221) ........................................................................................................... 27-8

27.22133 Unavailability of declarant for purposes of this rule (see sec. 27.2223) ........................................................................................................... 27-8

27.22134 When defendant has had prior opportunity for cross-examination for purposes of this rule (see sec. 27.2224) ........................................................................................................... 27-8

27.22135 Crawford rule applies to cases pending on direct review when Crawford was decided ........................................................................................................... 27-8

27.22136 Crawford does not apply to cases in which conviction was final when Crawford decided (i.e., Crawford does not apply retroactively to cases on collateral review: in general ........................................................................................................... 27-8
27.22137 Crawford does not apply to cases in which conviction was final when Crawford decided (i.e., Crawford does not apply retroactively to cases on collateral review): state courts are free to give Crawford broader retroactive application and to apply it in cases in which conviction was final (i.e., cases on collateral review) .............................................. 27-9

27.22138 Crawford rule does not bar use of testimonial statements for purposes other than establishing truth of matter asserted ............................................................ 27-9

27.22139 Crawford rule does not apply to reports, opinions, studies, etc. of other persons relied on by expert in giving opinion ........................................................................... 27-9

27.2214 New rule recognized in Crawford: where testimonial evidence is at issue, confrontation clause demands unavailability and prior opportunity for cross-examination (cont'd) .......................................................................................................... 27-9

27.22141 Forfeiture by wrongdoing doctrine: defendant forfeits right to application of Crawford rule when he or she obtains absence of witness by wrongdoing (see sec. 27.2217) .............................................. 27-9

27.22142 When defendant introduces hearsay statement of unavailable declarant, state's introduction of prior inconsistent statement of declarant, about which defendant had not had prior opportunity to cross-examine declarant, does not violate defendant's right to confrontation (see sec. 27.2215) .............................................. 27-9

27.2215 Threshold question before proceeding to confrontation issue is whether statements were admissible under rules of evidence; only if statements fall within hearsay exception or were erroneously admitted, is there need to apply confrontation analysis; if statements are not admissible under rules of evidence, they are excluded and court need not proceed to constitutional question .................................................... 27-9

27.2216 When defendant introduces hearsay statement of unavailable declarant, state's introduction of prior inconsistent statement of declarant, about which defendant had not had prior opportunity to cross-examine declarant, does not violate defendant's right to confrontation .............................................. 27-10

27.225 Reliability of statement for purposes of Roberts rule .................................................................. 27-17
27.2251 General principles .................................................................................................................. 27-17
27.22511 In general .......................................................................................................................... 27-17
Where testimonial evidence is at issue, confrontation clause is not satisfied by showing that unavailable witness's out-of-court statement is reliable; confrontation clause demands prior opportunity for cross-examination (see sec. 27.2213) 27-18

27.2252 Determining whether particular type of statement meets requirement of reliability 27-19

27.2254 Applicability of reliability requirement to particular types of statements 27-20

27.2255 Applicability of reliability requirement when statement not offered to prove truthfulness of its assertions (see sec. 27.12) 27-20

27.2256 Even when hearsay statement falls within recognized hearsay exception, court must determine whether unusual circumstances exist requiring exclusion of statement 27-20

27.2257 Other evidence introduced at trial tending to corroborate statement is not proper factor in determining whether statement is reliable for confrontation purposes 27-20

27.226 Particular types of statements 27-20
27.2261 Prior testimony subject to cross-examination 27-20
27.22611 In general 27-20
27.22612 Limitation on cross-examination due to scope of preliminary hearing, e.g., fact that party is precluded from attacking witness's credibility at preliminary hearing, does not automatically create confrontation bar to admission of that testimony at trial under old Roberts rule 27-21
Limitation on cross-examination due to scope of preliminary hearing, e.g., fact that party is precluded from attacking witness's credibility at preliminary hearing, creates confrontation bar to admission of that testimony at trial under new Crawford rule

27.2521 In general ................................................................................................... 27-25
27.2522 Fact that testimony is inculpatory only when taken together
with other evidence does not exempt testimony from
confrontation under this limitation ........................................................ 27-25
27.253 Ability of defendant to subpoena witness does not obviate
confrontation objection; burden of production of witness for cross-
examination is on state, not defendant .................................................. 27-25
27.254 Constitutionality of notice and demand statutes, under which
prosecutor provides notice to defendant of intent to use declarant's

29.212 Only first part of test for multiplicity involves double jeopardy protections

29.213 Even when multiple offenses are "same offense," double jeopardy does not bar prosecution and punishment for those offenses if legislature intended to permit such prosecution and punishment

29.214 Even when double jeopardy clause would prohibit multiple punishments for two offenses, it would not prohibit prosecution for the two offenses in a single prosecution

29.215 Multiple offenses must be "same offense" before double jeopardy violation can occur

29.216 When offenses are not the "same offense," but punishment for both is prohibited by legislature, only due process violation, not double jeopardy violation can occur

29.217 Single transaction can give rise to distinct offenses under separate statutes without violating double jeopardy clause

    29.3451 General rule (see sec. 29.3751) ........................................................................ 29-17

29.374 When court accepts guilty or no-contest plea to charge, but later before sentencing retakes plea to correct defects in original plea taking, defendant is not subjected to double jeopardy (see sec. 29.472) .......... 29-19
29.375 In multi-count case, if defendant is convicted on one or more counts and acquitted of one or more counts, and defendant successfully appeals conviction or convictions, acquittals pose no direct bar to retrying defendant because, with respect to those convictions, jeopardy is continuing .............................................................. 29-20
29.3751 General rule .................................................................................... 29-20
29.3752 Exception: retrial will be barred if state will need to prove that defendant committed crime of which he was acquitted ........ 29-20

29.4113 Particular situations (cont'd) .......................................................... 29-21

29.41132 Defense counsel's reference in opening statement to alternative theory of what happened for which no evidence, in particular defendant's testimony, was presented at trial ............................................................. 29-22

29.41133 Defense counsel's attempt to elicit from state witness, in sexual assault prosecution, testimony that witness engaged in unrelated earlier acts of sexual assault ............................................................. 29-22

29.41134 Defendant's failure to provide notice of alibi before calling witness who state asserts is alibi witness ..................................................................................... 29-22

29.41135 Defense counsel held in contempt and trial court is concerned with (1) its reputation and (2) likelihood that conviction would be overturned because of attorney's ineffectiveness ............................................. 29-22

29.4114 What constitutes objection by defendant .............................................. 29-22

29.4115 In determining whether to grant mistrial, trial court must consider alternatives (such as curative instruction by court, argument by state that will effectively counter defense counsel's misconduct, etc.) ...................................................................... 29-22

29.4116 Determining whether manifest necessity exists is matter of discretion for trial court and reviewing court must satisfy itself that trial court exercised sound discretion in concluding that manifest necessity existed for mistrial ............................................. 29-22

29.41161 In general ................................................................................. 29-23

29.41162 In exercising discretion, court should give parties full opportunity to state their respective positions ............................................. 29-23

29.41163 In exercising discretion, trial court must consider alternatives to mistrial (see sec. 29.4115) ............................................. 29-23

29.4117 Appellate review of trial court's initial exercise of discretion to grant mistrial and later decision denying motion to prohibit second trial on double jeopardy grounds ............................................. 29-23

29.41171 In general ................................................................................. 29-23

29.41172 Strict scrutiny of trial court's exercise of discretion not required in every case; in some situations, reviewing court should show deference to trial court's exercise of discretion ............................................. 29-23

29.41173 Although appeal is from judgment of conviction or order denying postconviction relief, appellate review is of trial court's order granting mistrial ............................................. 29-24

29.41174 There is spectrum of deference to circuit court's exercise of discretion in granting mistrial; in cases in which mistrial was ordered on basis of defense misconduct (e.g., improper opening statement, improper questioning of witness, etc.) circuit court's determination "is entitled to special respect" ............................................. 29-24
29.4118 Other matters ........................................................................................................... 29-24
  29.41181 Requirement that defendant raise double jeopardy claim prior to second trial to preserve issue for appellate review (see sec. 29.822) ........................................ 29-24
  29.41182 Defendant does not waive double jeopardy claim by seeking, as alternative to dismissal based on claim that trial was barred on double jeopardy grounds, a new trial based on other grounds (see sec. 29.827) ............................................................ 29-24
  29.41183 In determining whether "manifest necessity" existed when mistrial declared, reasons given at time mistrial declared trump later explanations, particularly when later explanations contradict what was said when mistrial declared ........................................ 29-24
29.412 When mistrial declared at defendant's request .......................................................... 29-24
  29.4121 General rule: retrial permitted ........................................................................ 29-24
  29.4122 Exception: retrial barred where mistrial attributable to prosecutorial overreaching (i.e., prosecutorial intent to subvert defendant's double jeopardy rights) ........................................ 29-25
    29.41221 In general ............................................................................................................. 29-25
    29.41222 Determination of prosecutor's intent involves factual finding that will not be reversed unless clearly erroneous ......................................................... 29-25
    29.41223 Police officer's improper testimony, which prompted defendant's mistrial request, will not be imputed to prosecutor in absence of evidence of collusion by prosecutor's office intended to provoke defendant's motion for mistrial ........................................ 29-25
  29.4123 Extension of exception: retrial barred even in absence of defendant's motion for mistrial when prosecutor has engaged in misconduct undertaken with intent to prevent acquittal, or to prejudice the possibility of acquittal, that prosecutor believed was likely in absence of misconduct (see sec. 29.447) ................................................................. 29-25
29.413 No need to determine sufficiency of evidence at first trial before second trial held ......................................................................................................................... 29-26

      29.42221 In general .......................................................................................................... 29-26
      29.42222 When, at close of evidence, judge expresses doubt about sufficiency of evidence to prove charged offense and indicates intention to give lesser-included offense instruction ........................................... 29-26
29.42223 When, at close of state’s case, court grants defendant’s motion for acquittal based on insufficiency of evidence to convict: in general .................. 29-26
29.42224 When, at close of state’s case, court grants defendant’s motion for acquittal based on insufficiency of evidence to convict: in state in which acquittal is final, double jeopardy clause prohibits court’s reconsideration of acquittal later in trial and submission of question of guilt to jury .......... 29-26

29.43232 When acquittal obtained through defendant's fraud .......................... 29-27

29.4333 In multi-count case, if defendant is convicted on one or more counts and acquitted of one or more counts, and defendant successfully appeals conviction or convictions, acquittals pose no direct bar to retrying defendant because, with respect to those convictions, jeopardy is continuing .................. 29-28

29.43331 General rule (see sec. 29.3751) ................................................................ 29-28
29.43332 Exception: retrial will be barred if state will need to prove that defendant committed crime of which he was acquitted (see sec. 29.3752) .................................................. 29-28

29.434 Apparent inconsistency between jury verdict of acquittal on some counts (on which verdict defendant relies to support invocation of issue preclusion) and jury’s failure to return verdict on other counts does not affect preclusive force of acquittals under double jeopardy clause .................................................. 29-28

29.435 Particular applications of constitutional collateral estoppel doctrine .................................................. 29-28

29.4351 Prosecution of defendant for perjury based on allegedly false testimony in prior prosecution in which defendant's false testimony was believed by jury and led to acquittal .................................................. 29-28

30.511 In general ............................................................................................................................... 30-24
30.512 When bias against counsel denies right to impartial judge ........................................ 30-25
30.513 Is defendant denied due process only if judge, in fact, treats him unfairly?; Is appearance of judge's partiality sufficient to establish constitutional violation? ................................................................. 30-25
30.514 Must defendant show actual bias, not simply appearance of partiality, to establish denial of right? .......................................................................................... 30-25
30.515 Presumption that judge is free of bias and prejudice ................................................... 30-25
30.516 Judge's prior statements of how he would rule on, or otherwise decide, particular matters as evidence of partiality .............................. 30-25
30.5161 Prior adverse legal rulings or expressions of views of the law are not sufficient to demonstrate bias .............................................................. 30-25
30.5162 Prior statements as to how judge would decide matter committed to his discretion (e.g., length of sentence upon revocation of extended supervision) may establish partiality ........................................... 30-25
30.517 When trial court's questioning of witness reveals its disbelief of defendant's testimony, court is not impartial ................................................................. 30-25
30.518 Opinions formed by judge on basis of facts introduced or events occurring in course of current proceedings or of prior proceedings do not constitute basis for bias or partiality motion unless they display deep-seated favoritism or antagonism that would make fair judgment impossible .......................................................... 30-25

30.52 Use Of Substitution Of Judge To Ensure Right To Impartial Judge (see sec. 6.61) .......................................................... 30-25

30.554 Judge's having conducted prior proceeding that is under review (see sec. 30.582) .......................................................... 30-26

30.555 Fact that judge consulted with victim's treating physician in determining whether treatment records contained exculpatory evidence .......................................................................................................................... 30-26

30.557 Fact that sentencing judge is facing recall effort based on judge's alleged leniency in sentencing .......................................................................................................................... 30-26

30.558 Fact that judge made ruling in prior case involving defendant, ruling was reversed by appellate court in that case, but in nonprecedential decision, and judge intends to make same ruling in present case .................................................. 30-26

30.559 Judge's calling of witness and questioning him outside presence of jury in manner that reveals disbelief of defendant's testimony, followed by prosecutor's use of witness in rebuttal .......................................................................................................................... 30-26

30.56 Particular Bases For Questioning Impartiality Of Judge (cont'd) .......................................................... 30-26

30.561 Judge noting the following on letter from probation agent suggesting that probation should not be extended because of failure to pay restitution: "No--I want his probation extended" .......................................................................................................................... 30-26

30.592 No need to provide different judge because judge has conducted prior proceeding that is under review .......................................................................................................................... 30-27

30.6 Right To Testify On Own Behalf

30.61 General Principles

30.611 In general

30.612 Nature of right

30.62 Particular Matters

30.621 Deterring exercise of right at suppression hearing by ruling that
testimony can be used for impeachment

30.622 When defendant's testimony refreshed by hypnosis

30.623 Testifying defendant has no right to consult with attorney during
brief break in testimony

30.624 Right not violated by enhancement of sentence based on defendant's
perjury at trial

30.625 Defendant has no right to testify falsely; right to testify does not
include right to commit perjury

30.626 When defense counsel keeps defendant from taking stand by threat to
withdraw from case if he does, the two-part Strickland test is
appropriate vehicle to assess defendant's contention that right to
testify was violated

30.6261 In general

30.6262 In applying Strickland test, court must determine whether
defendant prejudiced by counsel's conduct

30.627 Right not violated by refusing to permit testifying defendant to
challenge court's ruling permitting introduction of evidence of prior
conviction to impeach if defendant preemptively introduces such
evidence on direct examination

30.628 Applicability of harmless-error rule to denial of this right

30.63 Waiver Of Right

30.631 In general

30.632 May counsel waive defendant's right to testify in absence of
defendant's express disapproval?

30.6321 Yes (former rule)

30.6322 No (present rule)

30.633 Need for on-the-record colloquy with defendant outside presence of
jury to establish knowing and voluntary waiver of right

30.6331 In general

30.6332 Remedy for failure to conduct colloquy: If colloquy not
conducted, may its absence be rectified by post-conviction
inquiry into whether defendant knowingly and voluntarily
waived right?

30.634 Need for reaffirmation of waiver made at opening of defense case
after defense witnesses have testified

30.635 Withdrawal of waiver of right to testify on own behalf; reopening
evidence to allow defendant to testify when defendant changes his
mind after waiving right to testify

30.6351 In general

30.6352 Waiver or forfeiture of right to complain about trial court's
refusal to permit withdrawal of waiver of right to testify
(i.e., trial court's refusal to permit defendant to testify after
he waived right to testify)

waived right to testify (see sec. 30.6353) ................................. 30-30

evidence to allow defendant to testify when defendant changes his
mind after waiving right to testify (see sec. 30.635) .................... 30-30

30.711 In general .................................................................................. 30-30
30.712 Federal constitutional right to public trial is applicable to states .......... 30-31

Amendment; press has right of access to trial and related criminal
proceedings under First Amendment .............................................. 30-31

30.716 Test for determining whether right to public trial was denied ............ 30-31
30.7161 In general ............................................................................... 30-31
30.7162 Two-step test for determining whether right to public trial
was denied: (1) did closure at issue implicate constitutional
right to public trial? (2) if so, was closure justified under
circumstances of case? ................................................................. 30-31
30.7163 First step: did closure at issue implicate constitutional right
to public trial? ................................................................. 30-31
30.71631 In general ........................................................................ 30-31
30.71632 When closure of trial to public is so trivial that
constitutional right to public trial not implicated .......... 30-31
30.7164 Second step: was closure justified under circumstances of
case? ....................................................................................... 30-31
30.71641 Closure must meet four conditions ................................ 30-31
30.71642 Condition 1: Overriding interest that is likely to
be prejudiced by public trial must be present .......... 30-31
30.71643 Condition 2: Closure must be narrowly tailored
to protect interest ................................................................. 30-31
30.71644 Condition 3: Court must consider alternatives to
closure ................................................................. 30-32

30.75 Applicability Of Harmless-Error Rule To Denial Of This Right ......................... 30-34
30.751 General rule: harmless-error rule is not applicable to denial of right; prejudice is presumed and automatic reversal, without proof of prejudice, is required when right denied ........................................................................ 30-34
30.752 Is general rule applicable only when objection to denial of right made?; when defendant fails to object to closing of trial to public or particular members of public, may complaint about lack of public trial be raised only through claim of ineffective assistance of counsel, requiring showing of prejudice? 31.6 Penalty Enhancers ............................................................................................... 31-45

31.61 General Principles ............................................................................................. 31-45
31.611 Effect of penalty enhancer on substantive offense; does penalty enhancer become element of offense? ................................................................. 31-45
31.6111 In general ................................................................................................... 31-45
31.6112 Penalty enhancer that concerns facts or circumstances related to the underlying crime (e.g., while armed with a dangerous weapon, with one's identity concealed, etc.) alters substantive nature of charged offense by becoming an element of the offense that must be proved at trial beyond a reasonable doubt ............................................................................... 31-45
31.6113 Penalty enhancer based on defendant's prior commission or conviction of offense, which does not concern the factual circumstances surrounding underlying crime and does not change substantive nature of charged offense, is not element of offense that must be proved at trial beyond a reasonable doubt ............................................................................... 31-46

31.612 Manner or method of calculation of enhanced sentence; determining length of potential enhancement and periods of confinement and extended supervision ........................................................................ 31-46
31.6121 When multiple penalty enhancers applied ............................................... 31-46
31.61211 When two penalty enhancers are applicable to same crime, length of second penalty enhancer is based on maximum term for base crime as extended by first penalty enhancer .......................................................................................................... 31-46
31.6122 Under determinate sentencing, only term of confinement, not period of extended supervision, is increased by penalty enhancer .......................................................................................................... 31-46
31.61221 In general .................................................................................................. 31-46
31.6122 When trial court improperly allocates portion of enhanced sentence to extended supervision, remedy is remand for resentencing ......................... 31-46

31.6123 Under TIS-I version of determinate sentencing, for unclassified felonies penalty enhancer is added to underlying maximum term of confinement, which increases total term of imprisonment by same amount and then the 75% rule of Wis. Stat. § 973.01(2)(b)6 is applied to the total term of imprisonment to calculate the maximum amount of confinement ............................................................................................... 31-46

31.6124 Under TIS-I version of determinate sentencing, extended supervision portion of enhanced sentence cannot exceed extended supervision portion of sentence for underlying offense, even in those cases where it then becomes impossible to impose period of extended supervision that is at least 25% of period of confinement .................................................... 31-47

31.6125 When court has allocated portion of confinement under enhanced sentence to underlying offense that is in excess of maximum confinement for underlying offense, remedy is remand to trial court for resentencing ................................................... 31-47

31.613 If sentence does not exceed maximum for underlying offense, does appellate court need to decide whether enhanced penalty provision was applicable or properly applied? In such a situation, is any error harmless? .................................................................................................................... 31-47

31.6131 In general ................................................................................................... 31-47

31.6132 When penalty enhancer requires minimum sentence and sentence is greater than that minimum, portion of sentence may have been due to that enhancer, so appellate court must decide whether enhancer applicable ...................................................... 31-47

31.614 Effect of imposition of sentence for underlying offense, or of attributing portion of sentence to underlying offense, that is less than maximum possible for that offense ........................................................................ 31-47

31.6141 No need to decide whether penalty enhancer applicable when sentence imposed is within maximum for underlying offense (see sec. 31.613) ............................................................................ 31-47

31.6142 Court abuses discretion in allocating portion of sentence to repeater status when less than maximum sentence imposed .......... 31-47

31.6143 Penalty enhancement not applicable unless court seeks to impose sentence in excess of maximum prescribed by law .......... 31-47

31.6144 In multi-count cases, failure to make maximum sentence consecutive does not make sentence less than maximum; consecutive sentencing not required to trigger penalty enhancement provision ........................................................................ 31-47

31.6145 Does not invalidate portion of sentence attributed to penalty enhancer if total sentence, including portion attributed to penalty enhancer, exceeds maximum possible for underlying offense ........................................................................ 31-48

31.615 Liability of aider and abettor or coconspirator for a penalty enhancer when principal is one who provides basis for finding penalty enhancer present ........................................................................ 31-48
31.616 Burden and standard of proof on penalty enhancer based on defendant's prior conviction of crime ................................................................. 31-48
31.6161 In general ........................................................................................................ 31-48
31.6162 Constitutional requirements ........................................................................ 31-48
31.61621 In general ...................................................................................................... 31-48
31.61622 Is state required by constitution to prove penalty enhancer beyond a reasonable doubt? .............................................. 31-48
31.61623 Under constitution, may penalty enhancer only be proved by preponderance of the evidence? .............................................. 31-48
31.6161 Sentencing or resentencing for crime with enhanced penalty ................................ 31-48
31.6171 On resentencing after setting aside of penalty enhancer, appellate court can direct sentence to be imposed when trial court has allocated portion of sentence to substantive crime, but if trial court has not, resentencing by trial court is necessary ........................................................................................................ 31-48
31.618 Other matters .......................................................................................................... 31-48
31.6181 Sentence is not considered enhanced until court has imposed maximum possible sentence for underlying offense .................. 31-48
31.6182 When state alleges one penalty enhancer in complaint, but then alleges different penalty enhancer in information, penalty enhancer alleged in complaint is deemed abandoned ........................................................................................................ 31-48
31.6183 Effect of appellate court's holding that penalty enhancer cannot be sustained on conviction of underlying offense to which penalty enhancer was attached .............................................. 31-49
31.6184 When elements of penalty enhancer are not in fact present, court has no jurisdiction to impose enhanced penalty even though defendant has pled guilty to charging document alleging penalty enhancer ........................................................................................................ 31-49
31.6185 Imposition of two consecutive sentences, one for underlying substantive offense and other for penalty enhancer, violates double jeopardy (see sec. 29.685) ................................................................. 31-49
31.6186 Use of multiple enhancers based on prior convictions (see sec. 31.6281) ................................................................................................................................. 31-49
31.6187 When penalty for present offense is enhanced based on defendant's conviction of prior offense(s), i.e., his status as recidivist, enhanced punishment is only for present offense and not for offense(s) of which he was previously convicted ................................. 31-49
31.62 For Habitual Criminality Under State Repeater Statute .................................................... 31-49
31.621 Constitutionality of habitual criminality statute ................................................................. 31-49
31.6211 In general ........................................................................................................ 31-49
31.6212 Constitutionality of application to misdemeanor offenses which results in all misdemeanors ending up with same potential punishment regardless of seriousness .............................................. 31-49
31.6213 Constitutionality of application to attempt under which halving effect of attempt statute may be negated .............................................. 31-49
31.6214 Enhanced penalty is not additional punishment for earlier crime and thus does not violate double jeopardy (see sec. 29.696) ................................................................................................................................. 31-49
31.622 Purpose, effect, operation, and history of habitual criminality statute in general .................................................................................................................... 31-49
31.6221 In general ................................................................................................... 31-49
31.6222 Purpose of habitual criminality statute ...................................................... 31-50
31.6223 Effect of habitual criminality statute .......................................................... 31-50
31.62231 Effect of this penalty enhancer on substantive offense ...................................................... 31-50
31.62232 Repeater status does not constitute element of crime charged that must be proved at trial beyond reasonable doubt .............................................................. 31-50
31.62233 Does not create separate offense .................................................................. 31-50
31.6224 Operation of habitual criminality statute ...................................................... 31-50

31.62243 Meaning of "crime" in description of present offense for which punishment may be enhanced: includes motor vehicle offenses ........................................................................ 31-51
31.62244 When prior conviction occurs for purposes of habitual criminality statute (see sec. 31.6294) .................................................................. 31-51
31.62245 Requirement that prior conviction(s) that render one a repeater have been committed within preceding five-year period (see secs. 31.6257 and 31.6258) ........................................................................................................ 31-51
31.6225 History of habitual criminality statute .......................................................... 31-51
31.623 Prior convictions and other matters that may not be used to support repeater status .................................................................................................................. 31-51
31.6231 Prior conviction obtained in violation of defendant's constitutional rights (e.g., denial of counsel, lack of knowing and voluntary plea, etc.) ........................................................................ 31-51
31.62311 In general .................................................................................................. 31-51
31.62312 Constitutionality of placing burden of proof or production on defendant to show violation of constitutional rights ........................................................................................................ 31-51
31.62313 Constitutionality of limiting state's burden to prove constitutionality of conviction to making showing of constitutionality by preponderance of evidence ........................................................................ 31-51
31.6232 Read-in offenses .......................................................................................... 31-51
31.624 Alleging repeater status in charging document and amending charging document with respect to repeater status .......................................................... 31-51

31.62411 Requirement of allegation of repeater status in general .............................................. 31-52
31.62412 Required content of allegation of repeater status in general .............................................. 31-52
31.62413 Need to plead repeater allegation with relative clarity and precision ........................................................................................................ 31-52
Repeater allegation that correctly identifies nature of prior conviction, county where conviction occurred, and case number, but misstates date of conviction by one calendar day is sufficient to adequately charge repeater status ........................................ 31-52

Need to allege not only that defendant is repeater, but also the prior conviction(s) that render him or her a repeater ................................................................. 31-52

Failure of information to allege necessary factual information regarding prior conviction (i.e., nature and date) is not fatal if complaint alleges that information, so long as the two documents are not factually inconsistent with each other .................... 31-52

When defendant alleged to be repeater in information, but information lacks required allegation regarding nature of prior conviction(s) that renders him or her a repeater, state’s subsequent submission of certified copy of prior conviction(s) before defendant enters final plea operates as amendment of information curing its defects ................................................................. 31-52

When prior conviction is outside five-year period, but sufficient time is excluded by defendant’s incarceration to bring conviction within five years, it is not necessary to allege the period of incarceration ........................................................................ 31-52

Not necessary to allege repeater status in information, so long as allegation made in complaint ........................................................................................................ 31-53

Not necessary to allege enhanced penalty to which defendant is exposed ........................................ 31-53

Assuming notice of repeater status requires informing defendant of requirements under sec. 939.62 for proving repeater status, reference to statute number is sufficient ................................................... 31-53

Compliance with requirement that defendant have adequate notice of repeater status through repeater allegations raises constitutional due process concerns .......................................................... 31-53

Amending charging document with respect to repeater status ............................................................................................................................... 31-53

In general .................................................................................................................................. 31-53

By amending original charging document to include repeater allegation not initially made: in general ............................................................................................................ 31-53

By amending charging document that alleges repeater status to change information regarding prior conviction, e.g., its nature, its date, etc. .................. 31-54

By amending charging document that alleges repeater status to make technical corrections, e.g., corrections in designation of statutory subsection under which repeater allegation made ......................... 31-54

By amending charging document that alleges repeater status to correct error regarding that status ................................................................. 31-54

By amending incorrect recitation of additional punishment to which defendant would be liable as repeater ......................................................... 31-54

By amending charging document that alleges repeater status to add additional prior misdemeanor conviction to three prior misdemeanor convictions initially alleged as basis for repeater status ........................................... 31-54

Amending charging document with respect to repeater status (cont'd) ................................................................. 31-54

When defendant alleged to be repeater in information, but information lacks required allegation regarding nature of prior conviction(s) that renders him or her a repeater, state's subsequent submission of certified copy of prior conviction(s) before defendant enters final plea operates as amendment of information (see sec. 31.62417) ................................................................. 31-55

By dismissing original charging document without prejudice and filing new charging document with repeater allegation ........................................ 31-55

By amending charging document with respect to basis for repeater allegation, e.g., by substituting felony conviction not originally alleged in place of three misdemeanor convictions originally alleged ........ 31-55

By amending charging document with respect to basis for repeater allegation, e.g., by substituting new conviction(s) not originally alleged in place of convictions originally alleged ........................................ 31-55

31.62524  Admission, through guilty or no-contest plea to one charge, of prior convictions provides basis for sentencing as a repeater on any other charges that have been consolidated with the charge to which the guilty or no-contest plea was entered ........................................ 31-57
31.62525  Admission must be made by defendant personally; cannot be made by attorney ........................................ 31-57

31.6259 Other matters ........................................................................................................ 31-61

31.62591 Waiver of challenge to sufficiency of proof of prior conviction (see sec. 31.6287) ................................................................................................................... 31-61

31.6273 When substantive offense is attempt ........................................ 31-62

31.6274 Under determinate sentencing, only term of confinement, not period of extended supervision, is increased by habitual criminality penalty enhancer .................................................. 31-62

31.7632 Inclusion of mental state in one section of statute but omission from another section indicates legislative intent to exclude mental state from latter section ................................................................. 31-83
31.7633 Fact that severe criminal penalty is imposed for offense does not necessarily mean that offense is not strict liability offense ............................................................................................................... 31-83
31.764 Decriminalizing penalties alone is insufficient to manifest legislative intent that statute which previously had been construed to require scienter be applied as one of strict liability ................................................................. 31-83
31.765 Appellate review of question whether statute imposes strict liability .......... 31-83
31.766 Concern about infliction of substantial punishment on person innocent of any intentional or negligent wrongdoing, which often animates court's rejection of strict liability and finding that intent or knowledge is element of offense, does not support claim that in multiple-element offense, knowledge or intent is required with respect to each element ................................................................................................................................. 31-83

31.77 Determining What Constitutes Element Of Offense That Must Be Submitted To Jury And Proved Beyond A Reasonable Doubt ............................................................ 31-83
31.771 In general ............................................................................................................. 31-83
31.772 To determine elements of offense, one must look to statute proscribing that offense ................................................................................................................................. 31-84
31.773 Factor unrelated to facts and circumstances of present offense (e.g., prior conviction) that enhances punishment for particular offender is not necessarily element of offense ................................................................................................................... 31-84
31.774 Factor relating to facts or circumstances of present offense (e.g., death or great bodily harm resulting from offense) that increases maximum penalty for the offense may, as constitutional matter, be necessary element of offense ................................................................................................................... 31-84
31.775 Factor relating to facts and circumstances of present offense that establishes or increases mandatory minimum penalty for offense is not necessary element of offense ................................................................................................................................. 31-85
31.776 When statute creating offense provides that it does not apply to certain constitutionally protected conduct, fact that conduct is not constitutionally protected does not become element of offense that state must prove (see sec. 31.7987) ................................................................................................................................. 31-85
31.777 For purposes of "continuing series of violations" that are part of a continuing criminal enterprise, each of the "violations" that make up that "continuing series" are individual elements of offense ................................................................................................................................. 31-85
31.778 Other matters .......................................................................................................... 31-85
31.7781 Determining whether particular matter (e.g., use of firearm or other penalty enhancer relating to circumstances of offense) constitutes element of offense or sentencing factor ................................................................. 31-85
31.7782 Manner of participation in crime (i.e., theory of party-to-crime liability) is not element of offense ................................................................................................................................. 31-85
31.7783 Fact that matter set out in statute describing offense presents legal question (e.g., whether statement was material, whether court issuing order defendant violated had jurisdiction, etc.) does not prevent it from being element of offense when mixed question of fact and law is presented .................. 31-85

31.7784 When matter set out in statute describing offense presents pure question of law not requiring resolution of factual issue(s), it is not element of offense, but rather matter to be resolved by court ........................................................................................................... 31-85

31.7785 Determining elements of offense presents question of law that appellate court reviews de novo .................................................................................................................. 31-85

31.7786 Aggravating factor whose presence authorizes imposition of death penalty is functional element of offense that must be submitted to jury and proved beyond a reasonable doubt (see sec. 9.5183) ........................................................................................................... 31-85

31.7787 Need for jury determination, and proof beyond a reasonable doubt, of aggravating circumstance that permits imposition of sentence outside of standard sentencing range prescribed for offense .................................................................................................................. 31-85

31.77871 Need for jury determination (see sec. 26.4493) .................. 31-85

31.77872 Need for proof beyond a reasonable doubt (see sec. 30.3132) .............................................................................................................................................. 31-85

31.7788 Need for jury determination, and proof beyond a reasonable doubt, of any fact, other than fact of prior conviction, that increases penalty for crime beyond prescribed statutory maximum or that is necessary to support sentence exceeding maximum authorized by facts established by plea of guilty or jury verdict .................................................................................................................. 31-85

31.77881 Need for jury determination (see sec. 26.44) .................. 31-85

31.77882 Need for proof beyond a reasonable doubt (see sec. 30.313) .............................................................................................................................................. 31-85

31.7789 Elements generally relate to "conduct" prohibited .................................................................................................................. 31-85

31.779 Other matters (cont’d) .............................................................................................................................................. 31-85

31.7791 Determining whether valuation is element of offense or sentencing factor .............................................................................................................................................. 31-85

31.7792 Harmless error .............................................................................................................................................. 31-85

31.77921 Applicability of harmless error rule to instruction that relieves state of proving each element beyond a reasonable doubt because it misstates, omits, or is otherwise deficient with regard to, particular element (see sec. 11.7361) .............................................................................................................................................. 31-85

31.77922 Applicability of harmless error rule when court fails to require jury to find, beyond a reasonable doubt, fact that increases penalty for crime beyond prescribed statutory maximum, i.e., fact that permits imposition of sentence outside of standard range prescribed for offense (see sec. 11.7395) .............................................................................................................................................. 31-86
Apprendi decision does not create constitutional test for determining what elements of particular offense are; rather, it sets out test for determining what facts must be determined by jury and proved beyond reasonable doubt, whether or not those facts are elements of offense .................................. 31-87

Determining elements of offense is not matter of constitutional law, but rather matter of legislative mandate .......... 31-87

Unless otherwise designated by legislature, fact relevant to conviction is presumed to be element of offense .................. 31-87

Legislature may designate prior conviction as element of offense .................................................. 31-87

31.7931 In general ................................................................................................... 31-88

31.7932 Does prohibition on conviction of both inchoate and completed crime prohibit conviction of two inchoate crimes that have the same completed crime as their objective? (see sec. 31.7988) .................................................. 31-88

31.7933 Prohibition on conviction of both inchoate crime and completed crime does not prohibit charging both offenses .......... 31-88

31.794 Legislature's role in creating crime ...................................................................................... 31-88

31.7941 Only legislature can create crime ......................................................................................... 31-88
