Good evening,

As a follow-up to our discussion yesterday I wanted to send an update on Bode's processing of the DOJ SAKI kits. Just today the CLB received data in 25 additional SAKI kits from Bode, to bring the total number of Bode completed kits up to 75. This is evidence that Bode never stopped processing kits after the test group was completed.

We have begun to roll out the SAKI project plan to some of the CLB staff and have received very positive feedback. The staff are encouraged and ready to ramp up the DOJ efforts to complete analysis of these SAKI kits in the most timely manner possible while maintaining the highest level of quality.

I would be happy to answer any additional questions or concerns that you have.

Have a great night,

Nikki
